Series Description

This series consists of files of the National Aeronautics and Space Administration (NASA) Expendable Launch Vehicle (ELV) program (1958-1965). The program belonged to three different organizations during this period, first, the Office of Launch Vehicle Programs (OLVP) (1958-1961); second, Launch Vehicles and Propulsion Division in the Office of Manned Space Flight (OMSF) (1961-1962); and third, Launch Vehicle and Propulsion Programs in the Office of Space Science and Applications (OSSA) (1962-1965). Records contain office chronological
files, chronological files held by program personnel, and chronological files arranged by subject reflecting and supporting policy studies and analysis; files on program development; correspondence, and memoranda between NASA officials, private sources, and other U.S. Government agencies; records of official meetings; and speeches given before various organizations. Specifically, this series contains correspondence files; reports; meeting files; Centaur launch vehicle development; launch vehicle costs; interagency cooperation between NASA and the Department of Defense (DoD) on launch vehicle and launch facility policy; Saturn launch vehicles development; and launch vehicle program management.

**General Notes**
