April 11, 1970

REPLY TO  
ATTN OF: MAT

TO : Apollo 13 Flight Readiness Review Record  
FROM : MA/Apollo Program Director  
SUBJECT: Confirmation of Flight Readiness for the Apollo 13 Mission

The purpose of this memorandum is to document the final confirmation of Flight Readiness for the Apollo 13 Mission.

At the Flight Readiness Review (FRR) for the Apollo 13 Mission, held at MSC on March 5, 1970, seven action items and a number of significant open work items were identified and recorded in the official minutes. Subsequent to the FRR, an additional action item was identified by MSC. All such FRR action and open work items have been closed for Apollo 13.

Final assessment of mission readiness and favorable recommendations relative thereto were accomplished at the Pre-Lift Off Readiness Review held at MSC on April 9, 1970. This included the review and closeout for the Apollo 13 Mission of the Apollo 12 failures and anomalies. Certificates of Flight Worthiness have also been executed and submitted to the Apollo Program Director.

Based upon the Flight Readiness Review, the completion of all required action and open work, and the favorable conclusion of the Pre-Lift Off Readiness Review, the Space Vehicle for the Apollo 13 Mission is determined to be ready for launch on April 11, 1970.

  
Rocco A. Petrone
