

# CHRONOLOGY OF WAKEUP CALLS

Compiled by Colin Fries, NASA History Division

Updated 3/13/2015

The idea for the Wakeup Call chronology arose as a result of my dual interests in the history of music and the space program. I discovered as soon as I began working as an archivist at the NASA History Office that there was no complete list of these calls sent from Mission Control. There have always been inquiries about flown items and mission events as we all know, and those about wakeup calls and music played in space encompassed a steady stream (no pun intended)! And NASA's Web pages did provide audio for these calls beginning with STS-85 with the note that: "Wakeup calls are a longstanding tradition of the NASA program" -- yet nothing on when it started. One of the most frequent inquiries was and still is -- What was the first wakeup call? (I later learned that it was "Hello Dolly" sent during Gemini 6). So with the blessing of the history staff I began compiling a chronology using the sources in the NASA Historical Reference Collection here at NASA Headquarters. The Space Shuttle portion of the Chronology proved to be the most challenging since the Johnson Space Center Audio Control Room Recorder Log began with STS-80. In 2005, I was able to visit JSC Public Affairs and make copies from their query books to fill in the gap. Still there were Space Shuttle wakeup calls, even entire missions, that remained elusive. The other sources that I used are listed at the end of this PDF. Please excuse omissions, incorrect dates, or even totally wrong entries due to the patchwork nature of the data that I drew from. We welcome input to improve the accuracy of the list. We just ask that you provide a verifiable source. The excerpts that immediately follow were chosen as excellent explanations for the rationale that led to the tradition. Since the retirement of the Space Shuttle fleet it is on hiatus but it may be revived when NASA's Multi-Purpose Crew Vehicle is operational, or when commercial craft are flying on a regular basis.

*Use of music to awaken astronauts on space missions dates back at least to the Apollo Program, when astronauts returning from the Moon were serenaded by their colleagues in mission control with lyrics from popular songs that seemed appropriate to the occasion...Several crews have awakened on their final day in space to Dean Martin's popular song "Going Back to Houston."*

*The common element of all these selections is that they promote a sense of camaraderie and esprit de corps among the astronauts and ground support personnel. That, in fact, is the sole reason for having wake-up music; and it is the reason that NASA management has neither attempted to dictate its content nor allowed outside interests to influence the process.*

*From a letter from Lynn W. Heninger, Acting Assistant Administrator for Congressional Relations to Congressman Robert H. Michel - January 9, 1990*

**What do astronauts listen to in outer space? *Details* tracks the sounds of the final frontier  
*Details*, January 2000 By Steve Knopper**

*Aboard the space shuttle Discovery, astronaut Steve Robinson once used a 50-foot Japanese robotic arm to snare a four-ton satellite. But Robinson's greatest professional challenge came on the ground. Last June, while working at mission control, he was charged with playing wake-up music for another shuttle crew. One astronaut's wife made him promise to play Barry Manilow's*

*schmaltzy ballad "A Little Traveling Music, Please," and Robinson's flight director -- the mission control center's big boss -- insisted he play the rousing U.S. Air Force theme instead. A delicate decision.*

*"So I played 'em back-to-back. I thought they would cancel each other out," says Robinson tactfully. "The only complaints were from the navy guys on the crew. But I'm not sure if they were complaining about the air force song or Barry Manilow."*

*Think of the space shuttle as a high-tech road trip with a difference: You can't get out until the trip is over, pot and beer are forbidden, and 125 miles straight down, somebody who isn't even traveling with you gets to pick what's on the tape deck. That's often Chris Hadfield, chief mission control CAPCOM (capsule communicator), who oversees little details like wake-up music, which is broadcast on an intercom-type system with small speakers on the upper and lower decks of the shuttle.*

*"You play some lively, peppy bit of music -- normally just two minutes of it -- and after a pause, you hear some groggy voice on the microphone mumbling, 'Good morning, Houston,'" Hadfield explains. "You don't want to play a dirge or something uninspiring. You want to get them going in the morning." Consequently, the selections are usually benign -- it's considered poor form, and possibly dangerous, to freak out a sleeping astronaut with Rob Zombie or Eminem. But the DJs at mission control have been known to exhibit a mischievous streak. Once, to the crew's sleepy confusion, Hadfield chose the booming half-U2 version of the Mission: Impossible theme.*

*The 1965 Gemini VI mission was one of the first to include onboard music. Those brave astronauts got "Hello, Dolly!," as sung by clean-cut crooner Jack Jones. For the Apollo II moon mission, flight director Eugene F. Kranz psyched himself up with John Philip Sousa marches. In 1972, the Apollo 17 crew heard the Carpenters' "We've Only Just Begun." The cheese subsided somewhat with the 1975 Apollo-Soyuz Test Project, the first U.S.-Soviet manned space flight: That crew woke to the strains of Jerry Jeff Walker's "Up Against the Wall, Redneck Mother." Since then, more anthemic fare has prevailed: the theme from Rocky (1984), "Bohemian Rhapsody" (1989), and the Star Wars theme (1993). The '93 Columbia shuttle mission had better luck with hip reveilles including the Thompson Twins' "Doctor! Doctor!" and R.E.M.'s "Shiny Happy People." (It would be a different playlist if DJs did a set at mission control. Moby told Details he would play the Clash's six-gunning version of "I Fought the Law," and a little Bach or Hendrix. Master mixologist Armand Van Helden would spin Steve Miller's "Fly Like an Eagle" [what, no "Space Cowboy"?] and David Bowie's "Space Oddity." Mr. Space Oddity himself would choose Steve Reich's "Music for 18 Musicians.")*

*Because in space no one can hear you scream, "Turn that Crap down!," personal CD players and headphones help fly guys maintain their sanity. For his space-shuttle mission last year -- the one with Senator John Glenn, who preselected Louis Armstrong's "What a Wonderful World" as the wake-up call -- astronaut Steve Robinson brought 20 discs. While riding an exercise bike on the lower level, Robinson listened to electric-blues guitarists Albert King and Stevie Ray Vaughan. While staring literally into space, he chose a musician friend's version of Pachelbel's Canon. He fell asleep to Chris Isaak. "It's one of the most personal things that you're able to take up in space. Wherever your music is, that's sort of a version of home," says Robinson. Both Robinson and Hadfield belong to a 12-year-old, all-astronaut, Houston-based rock 'n' roll quartet known as Max-Q, whose rotating members cover bash-it-out standards like "Louie Louie." Named after an aerodynamics term for "maximum dynamic pressure," the band has yet to release any albums but occasionally plays NASA functions. In 1993, they woke up the Discovery crew with a cover of "Heartbreak Hotel."*

*Such musical experience comes in handy in space -- especially if you believe in cross-cultural exchanges. Four years ago, preparing for a shuttle mission to the Mir space station, Hadfield knew he would encounter Thomas Reiter, a German astronaut and accomplished classical guitarist. He also knew earlier Mir astronauts had left a beat-up acoustic for future crews -- which, he surmised, Reiter wouldn't appreciate. So Hadfield had a company modify an electric guitar, making it lighter than usual and foldable to fit his luggage. United on Mir, 250 miles above the Earth, Hadfield and Reiter sang Beatles songs and Russian folk ballads. Air guitar, says Hadfield, was never quite like this: "It's great floating weightless going around the world, playing guitar."*

*On the way back from Mir, Hadfield set his CD player for the Celtic weeper "Danny Boy," his favorite song ever, and watched the stars go by. The experience gave "Headphone music" a whole new meaning. "There are certain stanzas of music, certain harmonies, certain lyrics, which sometimes just send a warm rush up your backbone," Hadfield says. "And you get that almost continuously up there." And to think that we here down on Earth thought Barry Manilow couldn't possibly sound any better.*

*There were no formal wakeup calls sent to the crews of Mercury and Gemini. The missions in the early years of the human space program were relatively short. It was not until Gemini 7 that long term endurance really began to be tested since it lasted almost two weeks. During this mission and during Gemini 9 and 12 Mission Control piped the crew music during periods of relative inactivity, often in batches. Only some of it was sent at the end of the sleep period. I have included anything that I have found since it is the genesis of the concept, a concept not fully realized until the Apollo Program . The wakeup tradition seemed to begin in earnest and be sent on a regular basis only after Apollo 10. Specifically why this mission was selected is undetermined. Of course, you will ask why Apollo 11 is missing. Actually wakeup calls were sent on Apollo 11, but they were not music, they consisted of news and sports. I have usually only included music in this chronology, the exceptions being some interesting examples during the Space Shuttle Program.*

02 05 05 09 "First Call to Formation" (trumpet)  
07 19 39 33 "The Yankee Clipper, Apollo 12" (chorus)  
07 19 40 08 "The Second Time Around" (chorus)  
08 15 38 21 to 08 14 40 41 "The Yankee Clipper, Apollo 12" (chorus)

### APOLLO 15 July 26-August 7, 1971

8/2/71 "Tijuana Taxi" by Tijuana Brass  
8/4/71 - Theme From "2001: A Space Odyssey" Spacecraft communicator Karl Henize  
8/6/71 - "Anchors Aweigh" For Jim Irwin.  
8/7/71 - Al Kealoha Perry - "Hawaiian War Chant" from record "Hawaii Calls."

### APOLLO 17 December 7-19, 1972

*Gene and Jack had a total of thirteen wake-up calls during the mission. Ten times Houston picked out appropriate musical selections, albeit none of them "Hail Purdue" in honor of Gene's alma mater, Purdue University. There was no music for their first two wake-up calls in space. For the third morning, Houston picked "The Jayhawk Fight Song" in honor of Ron Evans' alma mater, Kansas University. There was no music again for the fourth morning but, for the fifth call, on the day that Gene and Jack made their landing, Houston played John Denver's version of "The City of New Orleans" which features the phrase "Good morning, America, how are you?" in the chorus. "America" is, of course, the name of the Apollo 17 Command Module. For Gene and Jack's first wake-up call on the Moon, Houston picked Wagner's "The Ride of the Valkyries", a tune regularly played on mornings of final exams at Caltech, which was Jack's undergraduate school. (Gordon Fullerton and Journal Editor Eric Jones were also Caltech undergrads.) Flight Director Gerry Griffin's alma mater, Texas A&M, was honored the next morning with a rendition of "The Aggie Fight Song". Strauss' "Thus Spake Zarathustra" is associated with space because of the Stanley Kubrick/Arthur C. Clarke film "2001: A Space Odyssey".]*

*[For the rest of the mission, the selections are: Roberta Flack's rendition of "If Ever I Saw Your Face", presumably a reference to the Moon below the orbiting spacecraft; the Doors' "Come on Baby Light My Fire", to be played on the day (December 17) that the Apollo 17 crew leaves lunar orbit for the trip home; "Home for the Holidays"; The Carpenters' "We've Only Just Begun", played in the belief that the end of Apollo is not the end of humanity's lunar adventure; and, for the morning of splashdown, a dual selection of the Navy's "Anchors Away" and the U.S. national anthem, "The Star Spangled Banner."]*

*[Journal Contributor Brian Lawrence notes that "the BBC used 'Also Sprach Zarathustra' to introduce their TV coverage of all the missions."]*

Apollo Lunar Surface Journal (after 183:33:55)

02 08 35 43 - 02 09 39 39 (TEC) (12/9/72) "Jayhawk Fight Song" in honor of Ron Evans' alma mater.

04 07 05 01 - 04 07 11 04 (TEC) (12/11/72) "City of New Orleans" - John Denver ("Good Morning, America" line in song refers to Command Module, America. The wake-up call for landing day was John Denver's version of the Steve Goodman song, "The City of New Orleans," with its chorus of "Good morning, America, how are ya?" It was a happy song that had been suggested by people on the night shift in the press room - a song that matched the mood of the crew and, indeed, country-music-fan Schmitt requested a replay while he and the others finished waking up.

From "Apollo Lunar Surface Journal"

05 14 15 05 (TEC) (12/12/72) "Ride of the Valkyries" by Wagner wake-up to Schmitt on Moon.

*"Jack Schmitt and Gordon Fullerton were both undergraduates at the California Institute of Technology. At 7:00a.m. it was traditional for students with hi-fi systems to tie them together and wake up everybody in the undergraduate dorms by playing 'The Ride' at full volume..." Bob Parker may have had the duty of choosing this piece. "In a February 1992 telephone conversation, Bob said that, if it was he who picked the piece, it was simply because he likes Wagner and can think of few things more stirring than the Ride. He also says that, in the Apollo era, the wake-up music was usually picked the night before and that they sometimes had trouble finding a recording in time."*

*From "Apollo Lunar Surface Journal"*

06 13 45 04 (TEC) (12/13/72) "Texas Aggie Fight Song" to lunar crew. Honors Flight Director's Gerry Griffin's alma mater, Texas A & M.

07 12 49 59 (TEC) (12/14/72) "Thus Spake Zarathustra" (Theme from "2001") by Richard Strauss to lunar crew

08 12 57 10 (TEC) (12/15/72) "The First Time Ever I Saw Your Face" by Roberta Flack to lunar crew. Presumably refers to face of the Moon below. Chosen by Neil Hutchinson.

09 09 30 51 - 09 09 38 54 (TEC) (Dec. 16, 1972) "Light My Fire" The Doors. Same day that crew ignites SPS and leaves lunar orbit.

10 07 50 01 (TEC) (12/17/72) "Home For the Holidays" by Jerry Vale.

11 08 20 01 (TEC) (12/18/72) "We've Only Just Begun" The Carpenters. "...played in the belief that the end of Apollo is not end of humanity's lunar adventure." From ALSJ. Followed by Christmas carol recorded by Ron Evans' neighbors. From MC.

12 07 20 02 (TEC) (12/19/72) "Anchors Aweigh" and "The Star Spangled Banner"

12 07 33 47 (TEC) (12/19/72) "Anchors Aweigh" again

## SKYLAB

### SKYLAB 2

6/21/73 Boatswain's Call and "Lonely Bull" by Herb Alpert & Tijuana Brass. The boatswain's pipe was directed to Pete Conrad by Paul Hand, probably because Conrad was Navy.

"You should have started doing that on about day 2," Conrad quipped.

"And the crew down here couldn't find a song for three bulls, it was only one," replied Capcom.

Conrad countered with, "Here's a little old song, love."

And then PAO filled in the background:

"That last song coming down from Skylab was out of Pete Conrad's repertoire of country-western music he has aboard."

## SPACE SHUTTLE

... the wakeup music is selected by the astronauts working as CAPsule COM municators (CAPCOM) for the mission. Traditionally, the music relates to mission objectives or to specific crew members. The speaker units onboard the Shuttle were designed to announce alarm tones, so they do not reproduce music very well. Therefore, songs chosen for wakeup must be very recognizable to the crew. Special greetings, or songs which provide commercial gain or profit cannot be used. Selected from recordings widely available to the public, the wakeup song list is reviewed and approved preflight. Within the highly structured environment of a Shuttle flight the morning wakeup presents an opportunity for levity and a bit of shared camaraderie. It tends to stand out as a human element in an otherwise complex technical enterprise.

*Kay Hire, spacecraft communicator on STS-79 in answer to a Mission Control Web question*

*On shuttle, at the appropriate time, mission controllers in Houston send wake-up music to the crew. Mission control picks the songs, with suggestions from astronauts' loved ones. Sometimes a family member will request a favorite song for a loved one. The station crew wakes up the "old-fashioned" way: the buzz of an alarm clock.*

*"How do astronauts sleep in space?" - FLORIDA TODAY By Chris Kridler 12/17/02*

*"Some missions have two shifts, so there is someone awake 24 hours a day," he [NASA spokesman Kelly Humphries] said. "On those missions, we don't do wake-up calls. On missions when the crew is on the same shift, we send up one when they're supposed to get out of bed." The wake-up calls are orchestrated before the mission, Humphries said. "A [crew-member's] family will say, 'I'd like to send this song up to my dad, because he's on orbit and he likes this song.' " Some songs fostered team spirit, Humphries said.*

"Blast-Off Columbia" Roy McCall

4/14/81

Short excerpt from an old Spike Jones record followed by a comic tape with voices of Houston DJs Hudson and Harrigan kidding Young and Crippen, then "Reveille". "It's splashdown, and Crip, you could both use a shower," said one member of the radio team. "You've waited for this for 12 years and if you don't wake up you're going to miss the whole darn thing." "Crip," said one voice, "get out of the rack." "No, no, no," said the other. "If he wakes up he'll spill coffee all over the controls." "Get to work, you guys. You've got 300 government agencies out there to support." Then Mission Control came back on the line. "Now hear this, now hear this, reveille, reveille, up all idlers. And that last wakeup call, we'd like you to scratch out 'splashdown' and insert 'touchdown,'" said Mission Control.

*In June 1965, 28-year-old Jim Henson started a written log of his activities in what became known as "The Red Book." He noted down what had happened up until that point (deemed "Ancient History") and then recorded anything that he felt was worth recording as single line journal entries until the end of 1988.*

**11/2/1981 "Recording Pigs in Space for NASA space shuttle."**

Posted on November 2, 2012 by [admin](#)

*After the Columbia space shuttle's successful inaugural round trip in April 1981, NASA asked Jim if the Muppets would record wake-up calls that would play for the astronauts on the second shuttle voyage launching that November 12th. The astronauts had a great affection (and professional admiration, no doubt,) for the crew of the Swinetrek from The Muppet Show. Captain Link Hogthrob (Jim), First Mate Piggy (Frank Oz), and Dr. Julius Strangepork (Jerry Nelson) were the clear choice to do the job. With input from a group of NASA astronauts, Jerry Juhl wrote five scripts for the five day mission. The team at mission control on the ground, including the pioneer Sally K. Ride, no doubt enjoyed waking Commander Joseph Engle and Pilot Richard Truly with personal ribbing from the Swinetrek crew. In the brief bits, Piggy, Link and Strangepork managed to make some truly terrible jokes (Richard Truly!) and personally teased the orbiting crew. In reference to the fact that this was the first time in history that a spacecraft was making a return trip into outer space, when Miss Piggy suggested that Strangepork's joke had been used before, he responded, "It doesn't matter. So has their spacecraft!"*

*After the launch, Jim received an autographed commemorative photo inscribed "To Capt. Hogthrob, F.M. Piggy & Dr. Stangepork. Thanks for your help and may the Swinetrek and the Columbia cross paths again." Jerry Juhl and his wife (and fellow Fraggle writer) Susan became friends with Sally Ride who oversaw the wake-up call program.*

**STS-2** November 12-14, 1981

- 11/13/81 "Pigs in Space" comedy routine #1 by The Muppets (arranged by Sally Ride).
- 11/14/81 "Pigs in Space" comedy routine #2 by The Muppets (arranged by Sally Ride), preceded by rendition of "Columbia, Gem of the Ocean" by the Flight Operations Directorate group "Contraband."

**STS-3** March 22-30, 1982

- 3/23/82 "On the Road Again" by Willie Nelson
- 3/24/82 "Marine Corps Hymn"
- 3/25/82 The Air Force Song ("Off We Go Into the Wild Blue Yonder") for the benefit of pilot C. Gordon Fullerton, an Air Force colonel, who commented: "That will get us off to a fast start."
- 3/26/82 "Sail Away" by Christopher Cross while over Madrid.
- 3/27/82 Exchange of music between the ground and the *Columbia*, the *Columbia* playing for the flight control team, "I'm Sitting On Top of the World" and the flight team transmitting up "Those Magnificent Men and Their Flying Machines."
- 3/28/82 "Six Days on the Road and I'm Gonna Make It Home Tonight" by Dave Dudley  
*NASA stretched the lyrics to make it eight days instead of six..."OK, that's good music, Houston," Lousma told capsule communicator Brewster Shaw, who had a radio station make a change in the tape.*
- 3/29/82 CAPCOM Steve Nagel uplinked "This is My Country" to the crew and the crew responded with downlink medley of the "The Air Force Song ("Off We Go Into the Wild Blue Yonder")" and the "Marine Corps Hymn."

- STS-4** June 27-July 4, 1982
- 6/28/82 "Up, Up and Away"
- 6/29/82 "Hold That Tiger" by Auburn University Band.  
Mattingly responded: "Good afternoon, we love that tune." He added, "Found out something up here though, you can't stomp your feet to it." Both astronauts are graduates of Auburn University.
- 6/30/82 Pilot Henry (Hank) Hartsfield's 25<sup>th</sup> wedding anniversary and on this first air/ground pass of the day, he received taped messages from his two daughters and his wife.
- 7/1/82 The astronauts got a wake-up call at 1:10 a.m. today from Houston control as the ship was passing over the Dakar, Senegal, tracking station. Columbia was making its 59th orbit at the time. There was no response at first from the crewmen, but mission control reported that engineering data showed the pilots were operating their food warmer for breakfast. Mattingly finally responded with a cheerful, "Good morning."
- 7/2/82 "Theme from 'Chariots of Fire'" by Vangelis
- 7/3/82 College fraternity songs, the Delta Tau Delta Fraternity for TK Mattingly, and Delta Chi for Hank Hartsfield.
- 7/4/82 "This is My Country"
- STS-5** November 11-16, 1982
- 11/12/82 "76 Trombones" from the "Music Man"
- 11/13/82 "Cotton-eyed Joe"
- 11/14/82 Marine's Hymn "Halls of Montezuma" in honor of two Marines onboard: Columbia pilot Bob Overmyer, active duty Marine Corps colonel, and Vance Brand who began his career as a Marine aviator
- 11/15/82 "The Stroll"
- 11/16/82 "Take Me Home, Country Roads" by John Denver
- STS-6** April 4-9, 1983
- 4/5/83 "Cadets on Parade" and The Air Force Song ("Off We Go Into the Wild Blue Yonder") by the United States Air Force Academy Band
- 4/6/83 "Teach Me Tiger" by April Stevens
- 4/7/83 "Theme from F-Troop"  
*The significance of that being referring to this crew as the F-crew for the purposes of training documents the crews have been listed alphabetically. A-crew was the STS-1 crew –John Young, Bob Crippen. B-crew was the STS-2 crew - Dick Truly and Joe Engle. Of course, now up to STS-6. This is the F-crew and in a jocular vein they refer to themselves not as the F-crew but the F-Troop and accordingly the significance of this mornings wake up call.*  
From STS-6 AIR/GROUND TRANSCRIPT
- 4/8/83 "The Poor Co-pilot," a tune from Korean War flying days sung by Oscar Brand and the Roger Wilco 4'
- 4/9/83 "Ode to the Lions" as rendered by Rusty Gordon. This is a Penn State song referring to the Nittany Lions, of Penn State University which is Paul Weitz alma mater. He earned his Bachelor in Aeronautical Engineering at Penn State in 1954.  
From STS-6 AIR/GROUND TRANSCRIPT
- STS-7** June 18-24, 1983
- 6/19/83 *The University of Texas Fight Song, of course, a tribute to the Mission Commander, Bob Crippen who is a UT graduate. It was preceded by the Texas A&M, Texas "Aggie", Fight Song which was a greeting card to Crip from Jerry Griffin, the Center Director at JSC, who is a Texas A&M graduate.*  
From STS-7 AIR/GROUND TRANSCRIPT
- 6/20/83 "A&M, Texas A&M Aggie War Hymn" followed by "Tufts Tonia's Day" as rendered by the Tufts University Beelzebubs, which is a student acappella group at Tufts University, Rick Hauck's alma mater.

- 6/21/83 "Texas Aggie War Hymn" followed by "Reveille" followed by "When You're Smiling", as rendered by Mary Cleave's father, Mary Cleave, the CAPCOM for this crew, and in response, Challenger down linked some music of its own, some version of "Tequila Sunrise."
- 6/22/83 "Texas A&M Aggie War Hymn" and the "Washington State University Cougar Fight Song", from which John Fabian is a graduate.
- 6/23/83 The uplink music was the "Texas A&M, Texas Aggie War Hymn," followed by the incomparable Leeland Stanford Junior University Marching Band, playing the "Stanford Hymn," which of course is the alma mater of Dr. Sally Ride and it sounded like the crew down linked a Beatles' song, "A Hard Day's Night".  
From STS-7 AIR/GROUND TRANSCRIPT
- 6/24/83 The usual few opening bars of the "Texas Aggie War Hymn;" that was followed by the "Florida State University Fight Song" played by the Florida State University Marching Chiefs. Norm Thagard is an alumnus of FSU.  
From STS-7 AIR/GROUND TRANSCRIPT

**STS-8** August 30-September 5, 1983

Mission events reversed with night launch and night-day activities.

- 8/31/83 "Georgia Tech Fight Song" for the alma mater of Commander Richard Truly.

- 9/2/83 "Penn State Fight Song" for Guy Bluford's Alma Mater
- 9/3/83 "University of North Carolina Fight Song" for alumnus Bill Thornton.
- 9/4/83 "Tala Sawari" performed by sitar player Ravi Shankar in honor of release of Indian INSAT satellite.
- 9/5/83 "Semper Fidelis" by John Philip Sousa. CAPCOM Brian O'Connor was a Marine Corps officer.

**STS-9** November 28-December 8, 1983

The crew worked two shifts around the clock. Therefore, no wakeup calls were sent.

**STS-41-B** February 3-11, 1984

- 2/4/84 *Wake-up music had been planned to be a selection from the "Contraband," that group of NASA employees and would have featured Ron McNair, astronaut Ron McNair on the tenor sax, but that somehow got garbled in the translation going up.*  
From STS-41-B AIR/GROUND TRANSCRIPT
- 2/5/84 "A Train" by "Contraband" which features as its tenor sax player, Dr. Ron McNair
- 2/6/84 "Glory, Glory, Colorado" by the University of Colorado Band. That's the fight song of that institution which is Vance Brand's alma mater followed by "Ride High You Mustangs" the Cal Poly State University fight song which is Pilot Robert Gibson's alma mater.
- 2/7/84 *Wake up music was an armed forces medley which covered three of the services. The Marine Corp., of course is Vance Brand's alma mater. He's now a civilian but was originally trained as a Marine Corps pilot. The Navy hymn in honor of Mission Specialist, Bruce McCandless and Challenger Pilot, Hoot Gibson, both Naval Officers. And the Army song honoring the nation's first United States Army Astronaut, Bob Stewart. And the music was performed by guess who, the U.S. Air Force Academy Chorale.*  
From STS-41-B AIR/GROUND TRANSCRIPT
- 2/8/84 *North Carolina A&T University alma mater of which Mission Specialist Ron McNair is an alumnus and "Southern to the Top", the fight song from the University of Southern Mississippi, the alma mater of Mission Specialist Bob Stewart.*  
From STS-41-B AIR/GROUND TRANSCRIPT
- 2/9/84 "Believe It Or Not (Theme from 'The Greatest American Hero')" by Joey Scarbury in honor of that day's EVA. With some changed verses
- 2/10/84 A live rendition of The Air Force Song ("Off We Go Into the Wild Blue Yonder") from all the Air Force CAPCOMs.
- 2/11/84 "In the Mood" by "Contraband", a musical group composed of JSC employees.

**STS-41-C** April 6-13, 1984

- 4/7/84 "A Boy Named Sue" by Johnny Cash.

- 4/8/84 Fight song of the University of California at Berkeley” followed by the Lehigh University Fight Song. The first in honor of Ox van Hoften, the second in honor of T. J. Hart.
- 4/9/84 “Believe It Or Not (Theme from ‘The Greatest American Hero’)” by Joey Scarbury
- 4/10/84 “Theme from ‘Chariots of Fire’” by Vangelis
- 4/11/84 “Gonna Fly Now (Theme From ‘Rocky’)” by Bill Conti
- 4/12/84 “Please Release Me” parody  
*Mission Control Houston, that harmonious wake up music performed by CAPCOM's Guy Gardner, and John Blaha with the aid of planning team Payload Officer Rob Kelso.*

9/30/88 Robin Williams opened with "Goooooooood Morning Discovery!!!" in "Good Morning Vietnam" style. The original recording produced by Houston area DJ from KKBQ, Mike Cahill, also included original lyrics recorded to the theme music of the TV show "Green Acres". Robin Williams was approached by Cahill about doing the tape. NASA knew nothing of the tape until it was offered as a gift by Cahill.

*Mike Cahill, writer, producer for KKBQ Radio, Houston and a part-time on-call tour guide at JSC, said he had listened*

to some wake-up calls a year and a half ago and some of them were, "You know, kind of awful. So what I did was thought gee it would be nice to write, produce and custom design songs for the astronauts. I picked three tunes that were pretty catchy, that were very short and upbeat. Green Acres was the first one. I thought gosh that would be the last thing they'll expect to hear." Pat Mattingly, who works in Mission Control, found out Cahill was doing them and said they were looking for new stuff. She gave a tape to CAPCOM Kathy Sullivan.

Mike wrote the lyrics in early 1987. Threw in Discovery because knew it would be next Orbiter to fly. He collaborated with Mark Richardson, the leader of a band named "Eclipse." Mike and Mark worked on putting the music together. Richardson played keyboard, guitars, drum machine. Mike called on Patrick Brennan who used to be with now-defunct group "Popkorn" that played in clubs around Clear Lake to do the vocals. Mike and Mark helped out on the chorus for Green Acres.

Green Acres was Mike's favorite. "It was as dopey and stupid and comy as I had hoped it would be." He said he wanted to show that NASA people have a sense of humor.

"It's the closest I'll ever get to going to space."

|               | <p>Discovery's astronauts generally toed the line on a new NASA edict to cut the comedy, at least for public viewing, but they showed some flashes of fun in space, mainly in the battle of wakeup songs. When Discovery made the first post-Challenger flight last September, the five astronauts awoke to Beach Boys music parodies and clowning for television cameras in bright Hawaiian shirts. And even though the December flight of Atlantis was a classified military mission, word leaked of special wakeup music not particularly flattering to the Pentagon. And both crews videotaped themselves playing in the weightlessness of orbit, turning somersaults, throwing a football and feeding each other candy. The tapes were shown at public gatherings. The astronauts' wacky wakeup calls and zany acrobatics got attention, which upset NASA because it felt the reports made the flights look like all play and no work.</p> <p>"We've learned that if you crack a joke or show somebody doing something funny, that's the 10 seconds that gets on the evening news, and not the two hours of work you just showed," Discovery commander Michael Coats said in a pre-launch interview.</p> |

*So space agency officials told Discovery's crew to cool it when the cameras or microphones were on.*

*"NASA has no official sense of humor anymore," said Bob Springer, one of Coats' crewmates. "So we're somewhat restricted now on what we can do."*

*Discovery's flight started out strictly following the policy, with wakeup calls played by Mission Control limited to presentations like the Marine Hymn, for the two crewmen who are Marines. But on Day 3, things loosened up.*

1/11/90 Parody set to the tune of "Let It Snow" - with a message to the crew in the lyrics of "Bring her home" meaning the Long Duration Exposure Facility (LDEF). It was a reminder that Columbia originally was to have been in orbit at Christmastime and that the astronauts had promised to bring the satellite back as a holiday gift to all those with experiments on board. Written and recorded by "The Prox Ops Boys", Dave Thompson, Mark Schrock, Brian Bertrand, Steve Walker, Ted Rickerl, and Greg Schrage.  
1/12/90 From the Mission Operations Directorate's Orbit Dynamics (aka Prox Ops) Office Parody "Hello LDEF", sung to the tune of "Hello Dolly" intended as a tribute to the cargo which was retrieved on 1/12/90. Written and sung by James C. Martin and his friend Terry Radomski. (Martin is the son of Mrs. F. C. Martin, secretary to LDEF Chief Scientist Bill Kinard)  
1/13/90 The astronauts took time out for a little fun Saturday afternoon, playing the song "Attack of the Killer Tomatoes" from the movie of the same name as they showed Mission Control a drawing of LDEF wildly entwined in tomato vines. It referred to the student (SEEDS) experiment, sending 12.5 million tomato seeds into orbit aboard LDEF.  
1/13/90 "Notre Dame Victory March" for pilot Jim Wetherbee, graduate of Notre Dame. Sung by quartet of JSC Mission Operations Directorate personnel, all Notre Dame graduates (Lead: Mark Ferring, class of '80. Tenor: Chris McKenna, class of '84. Baritone: Pete Hasbrook, class of '85. Bass: Fisher Reynolds, class of '82) "That was provided by local alumni of a school you know pretty well," said Mission Control's Ken Bowersox.  
"Yeah, there's a lot of Damers down there," said Wetherbee, a 1974 graduate of the school in aerospace engineering.  
CAPCOM: Ken Bowersox  
1/14/90 "Bow Down to Washington", University of Washington's fight song for Mission Specialist Bonnie Dunbar. (from tape with a bunch of fight songs performed by USC band)  
1/15/90 "Glory, Glory, Colorado", the University of Colorado fight song, in honor of Mission Specialist Marsha Ivins.  
1/16/90 Three-part wakeup call in honor of Shuttle Commander Dan Brandenstein's 47<sup>th</sup> birthday including: a trombone and piano ensemble playing "Danny Boy" performed by Martin and Radomski; Boston Celtics basketball forward Larry Bird offering congratulations to the crew and birthday wishes to Brandenstein; and Astronaut Office personnel singing "Happy Birthday". "Hi Dan. This is Larry Bird. Congratulations to you and the crew on the slam dunk with LDEF," referring to its rescue last week. He ended with, "Happy birthday and have a safe landing." Astronaut Kenneth Bowersox in mission control then said: "Good morning, Columbia, and a happy birthday to Danny boy."  
1/17/90 "Washington and Lee" the fight song of Washington and Lee University for David Low.  
1/18/90 "Born to Be Wild" Steppenwolf. "We're ready to rock and roll!" Wetherbee radioed referring to the return to Earth.  
1/19/90 "Anchor's Aweigh" for Lt. Commander U.S. Navy Wetherbee; and University of Wisconsin-River Falls' fight song performed by the school's pep band in honor of graduate Brandenstein.

**STS-110** April 8-22, 2002

- 4/9/2002 "The Best Years of Our Lives" by the Baha Men.
- 4/10/2002 "Rapunzel Got a Mohawk," performed by Joe Scruggs. The song was played for Ochoa, at the request of her family.
- 4/11/2002 University of California-Berkeley fight song performed by the school band and "All Right Now," performed by the Stanford University band. Ochoa requested the songs be played for crewmates Walheim and Smith who attended the rival schools. *Ochoa's also a Stanford graduate.* PC
- 4/12/2002 "Testify to Love," by Wynonna Judd played for Bloomfield from his family.
- 4/13/2002 "Voodoo Chile," by Jimi Hendrix. It was played for Morin, who will be making his first spacewalk, at the request of his wife.
- 4/14/2002 "All Star," performed by Smash Mouth from the Shrek movie soundtrack. The song was played for Walheim by his family.
- 4/15/2002 "Magic Carpet Ride" by Steppenwolf, dedicated to Smith.
- 4/16/2002 "I Am an American," performed by the Purdue University Marching band. It was dedicated to Purdue graduate Ross.
- 4/17/2002 "Noah," performed by Steve Frick when he was a teen-ager.
- 4/18/2002 "Somewhere Over the Rainbow" - STS-110 Commander Mike Bloomfield's daughter, Courtney.
- 4/19/2002 "Message in a Bottle," by The Police.

**STS-111** June 5 -19, 2002

- 6/6/2002 "Gettin' Jiggy Wit It," by Will Smith. The song was played for Valery Korzun, who will soon take command of the space station.
- 6/7/2002 "American Woman," by Lenny Kravitz, a song selected for Peggy Whitson.
- 6/8/2002 "I Have a Dream," by ABBA, a song selected for Sergei Treschev.
- 6/9/2002 "Drops of Jupiter" by Train, a tune selected for Ken Cockrell.
- 6/10/2002 "I Only Have Eyes for You" by the Flamingos, from the American Graffiti soundtrack which was selected for Paul Lockhart. *Selected by his wife Mary. The two danced to the song at their wedding.* PC
- 6/11/2002 "Mi PC" by Juan Luis Guerra, selected for Chang-Díaz by his family.
- 6/12/2002 "Chasing Sheep is Best Left to Shepherds," by Peter Greenaway, selected for Philippe Perrin by his family.
- 6/13/2002 "On the Road Again," by Willie Nelson, selected for Carl Walz by his family.
- 6/14/2002 "The Star Spangled Banner" in honor of Flag Day.
- 6/15/2002 "Hello to All the Children of the World" prepared by Expedition Four Flight Engineer Dan Bursch's son and his classmates.
- 6/16/2002 "Where My Heart Will Take Me," the theme song from TV series, "Star Trek: Enterprise," performed by Russell Watson. (see STS-114, Flight Day 8/2/2005)
- 6/17/2002 "The Eyes of Texas," performed by the University of Texas Marching Band. Cockrell and Lockhart hold degrees from that university.
- 6/18/2002 "Sojourner" by Matt Gast, the flight's lead timeliner or scheduler of crew activities.
- 6/19/2002 "I Got You Babe" by Sonny and Cher from the "Groundhog Day" movie soundtrack. *"Groundhog Day's "I Got You Babe" is a recurring theme for wakeup calls on missions which have been extended an additional two days, with the astronauts having to repeat their deorbit activities each day only to be told that because of bad weather they're going to go through the same tasks again the next day. For commander Ken Cockrell this was his third mission in a row where he's stayed in orbit for an additional two days in the hopes of good weather in Florida. On STS-80 the landing finally cooperated and he landed in Florida, for STS-98 and STS-111 he landed at the alternate site in California.* PC

**STS-112**            October 7-18, 2002

10/8/2002            "Venus and Mars" by Paul McCartney and Wings. It was for David Wolf, requested by his wife, Tammy.

10/9/2002            "The Best" by Tina Turner for Commander Jeff Ashby from his wife, Paige.

10/10/2002           The "medley of childhood songs" including "(Theme from) The Monkees" - The Monkees, "Rocket Man (I Think It's Going To Be a Long, Long Time)" - Elton John, "Space Oddity" - David Bowie and "I Am Woman" - Helen Reddy was played for Sandra Magnus from her family.

10/11/2002           "Oh Thou Tupelo," performed by the Wellesley College Choir, was for Pamela Melroy, a 1983 graduate.

10/12/2002           "Push It," performed by the group Garbage. It was for Piers Sellers, requested by his family.

10/13/2002           The "Aviation March," composed by Isaac Dunaevsky, is the hymn of the Moscow Aviation Institute, Yurchikhin's alma mater.

10/14/2002           "You Gave Me The Answer," by Paul McCartney and Wings for Dave Wolf from his wife Tammy.

10/15/2002           "Only an Ocean Away," performed by Sarah Brightman. It was requested for Sandy Magnus by her jogging friends.

10/16/2002           "Prime Time" by The Alan Parsons Project was played for Pilot Pam Melroy, requested by her husband, Chris.

10/17/2002           "These are the Days" performed by 10,000 Maniacs was played for Sellers at the request of his wife.

10/18/2002           "Someday Soon," performed by Suzy Bogguss. It was for Ashby, requested by his wife.

## A Spot On NASA's Playlist Gets A Song Heard Around The World (USAT)

By Traci Watson  
[USA Today](#), July 13, 2006

Early Saturday morning, Discovery's crew cabin was flooded with I Have A Dream, a syrupy ballad from the Swedish pop megastars of the '70s and '80s. The song was the latest in an enduring NASA tradition: the personalized wake-up call.

In a ritual dating to the Gemini program of the mid-1960s, astronauts awake not to alarms but to music chosen by family or friends. I Have A Dream was picked by the 8- and 11-year-old daughters of astronaut and unlikely ABBA fan Mark Kelly, a former Navy test pilot.

The songs may seem frivolous, but the astronauts welcome them as moments of good cheer during their hectic assignments, says astronaut Mario Runco, who's not part of the Discovery crew. As construction of the International Space Station ramps up and the workload on shuttle flights gets heavier, wake-up songs will serve as a morale booster, says Runco, whose collection has supplied many of the recordings piped up to space.

"When you hear something that's special and directed at you ... you realize you have the support on the ground," he says.

Crewmembers' friends and family say they're happy for the chance to brighten the astronauts' day. When Kelly wakes up Friday to U2's Beautiful Day, girlfriend Gabrielle Giffords, who chose it for him, hopes he'll be inspired.

"Something that's got a nice, moving melody is better than a punk rock song," she says.

The playlist is organized by the astronaut at Mission Control who serves as the link to the crew in space. Most wake-up songs fall into one of four categories:

•College and military. Well over half of the astronauts serve or have served in the military.

•Chirpy and upbeat. James Brown's I Got You (I Feel Good) is a perennial favorite.

•Earnest. Some spouses choose love songs. Others choose Christian tunes, such as God of Wonders, played last week for Discovery astronaut Michael Fossum.

•Tongue-in-cheek. Sonny & Cher's I Got You Babe was featured in the movie Groundhog Day, about a man who wakes up to the same day over and over. It's often played for crews whose launch or landing is delayed repeatedly.

Anthony DeCurtis, a contributing editor to Rolling Stone, says some kinds of music are nearly absent from the playlist. There is no hip-hop, for example. "These are people in an extreme situation," he says. "I'm not sure it's realistic to expect aesthetic daring."

Any kind of music can have a positive effect on mood as long as it's something the listener likes, says Pennsylvania State University's Valerie Stratton, who has studied music and emotions. At the same time, a song that gives one person a boost could seriously annoy another person.

"I think they need to agree on what they play," she says.

When the crew was asked whether there had been any teasing over the ABBA song, Kelly backed away from the microphone.

"I used to be an ABBA fan," crewmate Piers Sellers said pointedly. "Hey, Mark, come back!"

## Astronauts Rocked Awake By Recordings (AP)

By Seth Borenstein

AP, July 15, 2006

HOUSTON - These are not your father's astronauts aboard the space shuttle Discovery - at least judging by the music that's been waking them up every morning.

So far in their two-week mission, the crew's wake-up calls have included songs by Coldplay, Smashmouth and R. Kelly.

What ever happened to "Anchors Aweigh"?

For decades, it's been a tradition for NASA's mission control to start astronauts' days with carefully chosen wake-up calls. In the case of the current Discovery mission, those days start at about 1 a.m. EDT, so it helps to play something that gets the blood flowing and the foot tapping. (Tapping on the ceiling? It is space, after all.)

Astronauts' tastes have come a long way from the early days, when "Hello Dolly" was the first wake-up call in 1965 for Gemini 6. The rest of that decade was full of military marches and songs, along with Frank Sinatra, Dean Martin, Herb Alpert and classical music.

Today's astronauts have music that they can rock to while they roll in zero gravity.

"I was impressed," Blender magazine associate editor Josh Eells said. "I had this notion of astronauts being a little bit square. There's a little bit of hip taste there."

But taste, of course, is in the ear of listener. Asked if everyone likes all the songs played up there, astronaut Piers Sellers just rolled his eyes and shook his head.

Back in Houston, the DJ job goes to the capcom - "capsule communicator" - the astronaut on the ground who radios to the ones in space.

Astronaut Mario Runco, the capcom for 16 flights between 1995 and 2002, likes to think of himself as a "senior editor" of the list of requests given to him by astronauts' families, friends and co-workers.

When Runco rolled his tape - NASA mission control only recently started using a CD player - he had a few rules: Don't step on the music. Play a full two minutes. Try to pick a good fade out point.

But no matter how hard Runco tries to do justice to the music, the shuttle isn't exactly a place to get good sound.

"The speakers are fine for voice communications but their dynamic range is awful for music," Runco said in an e-mail. "Bose speakers they're not."

But on one of Runco's own trips to space, sound quality wasn't a problem. 20

A huge Star Trek fan, Runco was awoken by a taped personal greeting from Patrick Stewart - Jean-Luc Picard himself, from "Star Trek: The Next Generation" - set to the show's theme music. In the greeting, Stewart said to Runco: "Make it so."

Getting a prerecorded call is one thing, but last November, International Space Station astronauts Bill McArthur and Valery Tokarev were treated to a live wake-up miniconcert by Paul McCartney - part of a performance he was giving in Anaheim, Calif.

"I can't believe that we're actually transmitting to space," McCartney said as McArthur did a zero-gravity flip.

McCartney played "English Tea" and "Good Day Sunshine," in what was the longest Earth-to-space wake-up call, clocking in at nearly 14 minutes.

- 7/5/2006 "Lift Every Voice and Sing" by the New Galveston Chorale played for Mission Specialist Stephanie Wilson.
- 7/6/2006 "Daniel" by Elton John played for Mission Specialist Thomas Reiter in honor of his son.
- 7/7/2006 "Good Day Sunshine" by the Beatles played for Mission Specialist Lisa Nowak.
- 7/8/2006 "God of Wonders" by Mark Byrd and Steve Hindalong played for Mission Specialist Mike Fossum. Selected by his family.
- 7/9/2006 "I Had a Dream" by ABBA for Shuttle Pilot Mark Kelly. Requested by his daughters, Claire and Claudia. Mark had a dream as a young boy-- he wanted to go to space and float with the stars. So, on the sixth day of the mission, he was coaxed from his sleeping bag on the ceiling by the music of ABBA. He responded by saying: "Sometimes it is like a dream up here. Floating is a big part of that. The view outside the window is incredible right now. I'm not sure what we're over, but we can see land down there."
- 7/10/2006 "Clocks" by Coldplay for Mission Specialist Piers Sellers. Requested by his family.
- 7/11/2006 "All Star" by Smashmouth for Mission Specialist Lisa Nowak. Requested by her family.
- 7/12/2006 "I Believe I Can Fly" by R. Kelly for Mission Specialist Stephanie Wilson.
- 7/13/2006 Theme from the television show "Charlies Angels" for the entire STS-121 crew from their training team.
- 7/14/2006 "Aggie War Hymn" by the The Fightin' Texas Aggie Band for Mission Specialist Mike Fossum, a graduate of Texas A&M University. According to Mission Control, the selection was sent by Fossum's wife. He is the first Texas A&M graduate in space .  
 "You know Mike, there are quite a few Aggies right here in Mission Control, and all throughout Texas, who have been watching you intently during this mission," said astronaut Steve Swanson from Mission Control in Houston. "I think we can say the eyes of Texas are upon you."
- 7/15/2006 "Beautiful Day" by U2 for Pilot Mark Kelly, on undocking day.
- 7/16/2006 "Just Like Heaven" by The Cure for Mission Specialist Piers Sellers. It was requested by his family.
- 7/17/2006 "The Astronaut" by Something Corporate for Commander Steve Lindsey.

October 23-November 7, 2007

- 10/24/2007 "Lord of the Dance," performed by John Langstaff, was played for Commander Pam Melroy.
- 10/25/2007 "Dancing in the Moonlight" by King Harvest for astronaut Dan Tani. "It's moving day for me and I can't wait to settle in my new home," said Tani.
- 10/26/2007 "Rocket Man (I Think It's Going To Be a Long, Long Time)" by Elton John, played for Mission Specialist Doug Wheelock on the day he performs the first spacewalk of his career.
- 10/27/2007 "Bellissime Stelle" (Beautiful Stars) by Andrea Bocelli was played for European Space Agency astronaut Paolo Nespoli of Italy, the country where the new node, Harmony, was built.
- 10/28/2007 "What a Wonderful World," by Louis Armstrong, was played for Mission Specialist Scott Parazynski on the day he makes his second spacewalk of the mission. "That's how you start the day in space," Parazynski said. "I can't think of a more beautiful way to begin the day than hear those words. It really describes the view from space."
- 10/29/2007 "One by One" by Wynton Marsalis, was played for Mission Specialist Stephanie Wilson, one of the robot arm operators for this morning's hand off of the P6 truss element between the shuttle and station robot arms.
- 10/30/2007 "Malaguena Salerosa" by Chingon, was played for Pilot George Zamka, who will be operating the shuttle robotic arm.
- 10/31/2007 "Nel Blu Dipinto di Blu" by Domenico Modugno, for Mission Specialist Paolo Nespoli. The song's title translates as "In the blue (sky), painted blue;" it is widely known as "Volare."
- 11/1/2007 "The Lion Sleeps Tonight" by Robert John. The song was chosen by the crew's training team. "That was a lot of fun," Discovery commander Pamela Melroy said. "That certainly gets you going first thing in the morning."

- 11/2/2007 "World" by Five for Fighting for Mission Specialist Doug Wheelock, who will be performing his third spacewalk on Saturday. Wheelock dedicated the song to the ground support team.
- 11/3/2007 The crews of Space Shuttle Discovery and the station were awakened this morning at 12:38 with composer John Williams' theme song from the original "Star Wars" movie trilogy. The song was played for Parazynski.
- 11/4/2007 The crews of Discovery and the International Space Station were awakened before the change from daylight to standard time. The crew was roused at 1:08 a.m. CDT with the song "The Presence of the Lord," written by gospel musician Kurt Carr, originally recorded by Byron Cage. Cage's rendition was played for Mission Specialist Stephanie Wilson. Crew member Stephanie Wilson says she appreciates the selection. She says being in space has made her "very thankful" for the support of family, friends and the shuttle ground control team.
- 11/5/2007 "Roll Me Away" by Bob Seger, played for Pilot George Zamka, who will be at the controls of Discovery when it undocks from the station. "That's a great song about a road trip and we've had a great one, but it's time to turn around and head for home," astronaut George Zamka said.
- 11/6/2007 "Space Truckin'" by Deep Purple, played for Expedition 15/16 Flight Engineer and Mission Specialist Clay Anderson, who will wrap up a five-month mission to the International Space Station when Discovery lands.

## Space Shuttle Atlantis Astronaut Chooses Quincy Jones' 1969 Recording 'Walking in Space' as His Wake-Up Music

CAPE CANAVERAL, Fla., Dec. 2 /PRNewswire/ -- When the Space Shuttle Atlantis launches from Cape Canaveral, Florida on Thursday, December 6th on its mission to deliver the European Space Agency's Columbus laboratory to the International Space Station, Astronaut Leland Melvin will have in tow a copy of Quincy Jones' 1969 Grammy Award winning recording "Walking in Space," which he will use as his wake-up music during the mission.

Commented Melvin, "Quincy Jones is someone who I have a great deal of respect and admiration for and I couldn't think of a more appropriate selection to use as my wake-up music."

Melvin's duties on the Shuttle Atlantis mission will be to support three space walks using the robotic arm and install the Columbus laboratory from Atlantis' payload bay to its permanent home on the International Space Station.

Commented Jones, "I am truly honored that Mr. Melvin has chosen one of my pieces of work for this momentous occasion. I was inspired to record the 'Walking in Space' album in 1969 after Buzz Aldrin told me that he had played my arrangement of Frank Sinatra's 'Fly Me To The Moon' during his space flight to the moon, so to have it come full circle like this is quite remarkable and very humbling."

A jazz-R&B-pop fusion album that helped usher in a new era in R&B music in the early 70's, "Walking in Space" won Jones a Grammy Award for Best Jazz Instrumental Performance By a Large Group. Citing his groundbreaking work on "Walking in Space," in 1998 Time Magazine named Quincy Jones one of the most influential jazz musicians of the 20th Century. In January, Jones will receive the nation's highest jazz honor when he is recognized as a Jazz Master by the National Endowment for the Arts.

## Lab Secured to Space Station

By LIZ AUSTIN PETERSON, Associated Press Writer

Tue Feb 12, 10:12 AM

...The astronauts also participated in a chat with music impresario Quincy Jones and radio talk show host Tavis Smiley. Astronaut Leland Melvin, a pianist, carried into orbit a recording of Jones' 1969 Grammy Award-winning "Walking in Space."

Melvin said he believes Jones' music inspires the kind of creativity that will one day lead astronauts to Mars and beyond.

"It has something that reaches into your soul and it makes you think," he said. "It makes you wonder. That's exactly what we need to do."...

Excerpt from **THE ROCK AND ROLL HALL OF FAME GOES TO OUTERSPACE ON THE SHUTTLE ATLANTIS**

D: ... Now I know that once and a while you guys get awakened by music from Earth, who picks it and what was your first choice?

G: That's a good question. It's true, we have what we call wake up music and each crew member is allotted one or two days, (depending on how long your mission is on the Space Shuttle) for the whole crew to be awakened by that persons music that day. The music is not typically picked by the Astronauts, but by the Astronaut's family. Sometimes they tell you what they are picking and sometimes they don't. For me, on my first flight, it was the fourth day of the mission and that was when I was going outside to do a Space walk. It was a big day for me and it was my first Space Walk. My wife picked the music and unbeknown to me it was "Saturday Night" by the Bay City Rollers. The reason she picked that is when I go snowboarding – at least that season prior to the flight – I had the tendency to sing that song for myself before I would go into the Terrain Park and jump to try and get my courage up. She figured that would be appropriate to try and get me psyched up and get my courage up to go outside a little S-A-T-U-R-D-A-Y night.

3/11/2008

"Linus & Lucy" by Vince Guaraldi Trio. The song, which is from the album "Charlie Brown Christmas" was played for Mission Specialist Mike Foreman. "Good morning, Endeavour. And a special good morning to you, Mike," astronaut Al Drew radioed from the Johnson Space Center. "Well good morning, Houston, we appreciate that song," Foreman replied. "We had an exciting trip to orbit yesterday morning and we're looking forward to our first full day in orbit."

3/12/2008

The wakeup call for the morning was a combination of fight scene music from the Japanese movie "Godzilla Versus Space Godzilla" and the Blue Oyster Cult song "Godzilla." The songs were played for Japanese Space Agency astronaut Takao Doi. "Good morning Endeavour. Doi san, ohayo gozaimasu," said Alvin Drew, shuttle spacecraft communicator, to Japanese astronaut Takao Doi from Mission Control here in Houston. "Take on today like a monster." "We are very happy to hear Godzilla," Doi responded. "We

are ready to go and we'll have a great time today docking with the space station."

3/13/2008 "Saturday Night" by Bay City Rollers, was played for the station's newest crew member, Flight Engineer Garrett Reisman. "Just want to say that the song was an outstanding selection. Thank you very much," said Reisman, who flew up aboard Endeavour and replaced European Space Agency astronaut Leopold Eyharts as outpost Flight Engineer 2. "We're all pumped up, and we're ready to go out the hatch, and doing it all and having a ball in space on Saturday night!"

3/14/2008 "Turn! Turn! Turn! (To Everything There is a Season)" by The Byrds. The song was played for Mission Specialist Rick Linnehan.

3/15/2008 "We're Going to be Friends" by the White Stripes. The song was played for Mission Specialist Robert L. Behnken. "Thanks for that, Al," Robert Behnken replied. "Good morning to you as well, and thanks for that great wakeup music, that's one of my favorite songs. It always reminds me of all the great friends that I've met going to different schools, or through different training, just like the shuttle crew I'm with right now. Thanks again, Al, and a great good morning to you." "You bet. Have a fine day out there."

3/16/2008 "God of Wonders" by "Caedmon's Call". The song was played for Endeavour's commander, Dominic Gorie.

3/17/2008 "Sharing the World," a song written by Pilot Gregory H. Johnson's brother.

3/18/2008 Ayaka Hirahara's "Hoshi Tsumugi no Uta", a Japanese song that translates to "Song of Spinning Stars". The song was played for Mission Specialist Takao Doi, a Japan Aerospace Exploration Agency astronaut.

3/19/2008 "Burning Love" by Elvis Presley, played for Mission Specialist Mike Foreman.

3/20/2008 "Blue Sky" by Big Head Todd and the Monsters, was played for Mission Specialist Rick Linnehan, who will serve as the spacewalk coordinator for today's 6.5-hour-long excursion by Mission Specialists Robert L. Behnken and Mike Foreman.

3/21/2008 "Enter Sandman" performed by Metallica. The song was played for Mission Specialist Robert L. Behnken.

3/22/2008 Heartland's "I Loved Her First". The song was played for Endeavour Commander Dominic Gorie.

3/23/2008 Newsboys song, "I am Free." The song was played for Mission Specialist Mike Foreman and performed by the Friendswood United Methodist Church Praise Team at his church. "Good morning, Endeavour and Happy Easter to you Mike," NASA astronaut Alvin Drew radioed up from Mission Control. "Good morning, Houston and thanks Alvin, that's one of my favorite songs from church," Foreman said. "That was awesome, and how appropriate for this special day. It sounds just as good up here as it does down there. Happy Easter." Drew wished the rest of Endeavour's astronauts a Happy Easter as well, though they were busy at the time. "They're probably searching for their eggs," Foreman said.

3/24/2008 "Furusato," a Japanese folksong that translates to "home" in English. The song was performed by Yuko Doi, and played for Japan Aerospace Exploration Agency astronaut Takao Doi.

3/25/2008 "Con Te Partiro" an Italian song that translates to "I will go with you." The song was performed by Andrea Bocelli and played for French astronaut Leopold Eyharts. "I'd like to see everybody back on Earth," Eyharts told flight controllers. "Thanks a lot for the music and see you very soon."

3/26/2008 "Drops of Jupiter" by Train was played for Pilot Gregory H. Johnson.

## As Ariz. Congresswoman Watches, Husband Heads Into Orbit (AZREP)

By John Faherty

Arizona Republic, June 1, 2008

...This will be [Space Shuttle Discovery Commander Mark] Kelly's third flight into space. On his second mission, in July 2006, when he piloted the space shuttle Discovery, Kelly and [Gabrielle] Giffords [U.S. representative from Arizona's 8th Congressional District] were dating but not yet engaged. During shuttle flights, the close friends and family of astronauts are allowed to choose the music that will wake the pilots from sleep in space.

In 2006, Giffords chose Beautiful Day. "I'm a big U2 fan, and he likes the band as well," Giffords said. That morning the music was a surprise, but marriages seemingly change everything.

For this flight, Giffords has selected songs to wake the crew on two days. "Crystal Frontier" by the Tucson-based band Calexico and the reveille, the bugle call used to wake students at the U.S. Merchant Marine Academy, where Kelly went to college.

He already knows what will be playing this time. "After you are married, it's hard to keep a secret," Giffords said with a laugh. "He didn't know about U2, but he knows this." ...

6/1/2008	"Your Wildest Dreams" by the Moody Blues. The song was played for Pilot Ken Ham.
6/2/2008	"Away from Home" performed by Jose Molina Serrano. The song was played for Mission Specialist Greg Chamitoff.
6/3/2008	"Hold Me with the Robot Arm" performed by Yusuke Hanawa. The song was played for Japan Aerospace Exploration Agency astronaut Aki Hoshide.
6/4/2008	"Have You Ever" performed by Brandi Carlile. The song was played for Mission Specialist Karen Nyberg.
6/5/2008	"Fly Away" by Lenny Kravitz was played for Mission Specialist Ron Garan.
6/6/2008	"Bright as Yellow" by Innocence Mission was played for Mission Specialist Karen Nyberg.
6/7/2008	"Taking Off" by Godaigo was played for Mission Specialist Akihiko Hoshide.
6/8/2008	The theme music from "The Mickey Mouse Club" was played for the STS-124 crew.
6/9/2008	"The Spirit of Aggieland" performed by the Fightin' Texas Aggie Band was played for Mission Specialist Mike Fossum.
6/10/2008	"All Because of You" by U2 was played for Mission Specialist Ron Garan.
6/11/2008	"Centerfield" by John Fogerty was played for Pilot Ken Ham. Mission Control here roused the astronauts early Wednesday with the song "Centerfield" by John Fogerty, a tune selected for Ham by his wife Michelle. "Girl, you are my home, and all of us are going to start our journey home today," Ham told his wife via Mission Control as the shuttle and space station zipped around the planet at 17,500 mph (28,163 kph). "From my rough calculations, that's about a million miles, but we're going really fast so we're on our way."
6/12/2008	"Crystal Frontier" by Calexico was played for Commander Mark Kelly.
6/13/2008	"Baby, Won't You Please Come Home" performed by Louis Prima and Keely Smith, selected by Mr. Reisman's wife, was played for Mission Specialist Garrett Reisman. Mr. Reisman thanked the people on the ground for the song, and said "A special good morning to Simone, my favorite earthling." He added, "Get ready, doll face: Discovery's coming home."
6/14/2008	"Life on an Ocean Wave" performed by the U.S. Merchant Marine Academy Band was played for Commander Mark Kelly and the entire crew.

## Brandon Heath Wins Emmy And Has Space Shuttle Encounter (Beliefnet.)

By Joanne Brokaw

[Beliefnet.com \(blog\)](#), February 11, 2010

Brandon Heath recently won a Midsouth Regional Emmy Award for his blockbuster hit "Give Me Your Eyes," which served as the catalyst for Nashville Rescue Mission's Hunger to Hope 2009 PSA Campaign, produced by NewsChannel 5's Jerry L. Walker, WTVF-TV (CBS).

Adding to the excitement, the song was chosen by NASA as the 5:14pm CT wake-up call for the Endeavour shuttle crew, on their first day in orbit, in honor of first-time flyer Pilot Terry Virts, who is a fan of Heath's music. Virts invited Heath to join his family as a special guest at the launch yesterday from NASA's Kennedy Space Center in Florida. (The video above is what the astronauts heard.)

Cool, huh?

In a press release, Brandon said, "Having my song included in a PSA talking about serving the poor was hugely rewarding. The Emmy is a nice statue, loving Nashville's homeless is monumental. I'm especially grateful to WTVF NewsChannel 5, and Jackie Pillers, and to Jerry Walker for the idea."

"Give Me Your Eyes" appears on Brandon's 2008 Grammy-nominated sophomore album, What If We. The album has delivered back-to-back No. 1 singles with "Give Me Your Eyes," which captured 14 weeks at No.1 on Billboard's Hot Christian AC radio chart, plus 27 weeks at No. 1 on iTunes Christian Song Chart, with 439,000 total digital downloads. The second single "Wait And See" topped Billboard's Christian AC Indicator chart in July 2009. The album's current single "Love Never Fails" moves into Top 20 at Billboard's AC Monitored this week.

2/8/2010	"Give Me Your Eyes" by Brandon Heath, played for Pilot Terry Virts.
2/9/2010	"Katmandu" by Bob Seger, was played for Commander George Zamka.
2/10/2010	"Also Sprach Zarathustra" by Richard Strauss, played for Mission Specialist Nicholas Patrick. The song is most widely known as the theme from the movie "2001: A Space Odyssey."
2/11/2010	"Beautiful Day" by U2, played for Mission Specialist Kay Hire.
2/12/2010	The "Firefly" TV show theme song, "The Ballad of Serenity" by Sonny Rhodes played for Mission Specialist Bob Behnken.
2/13/2010	"Too Much Stuff" by Delbert McClinton, played for Mission Specialist Stephen Robinson.
2/14/2010	"Forty Years On" the Harrow School (London) song, for Harrow alumnus Mission Specialist Nicholas Patrick.
2/15/2010	"Parabola" performed by Tool for Mission Specialist Robert Behnken.
2/16/2010	"Window on the World" by Jimmy Buffett, played for Mission Specialist Kathryn Hire. "That song is very appropriate today," said Endeavour mission specialist Kay Hire. "On a day that we'll be working on opening our new window on the world." "Our wakeup music today on Endeavour was Jimmy Buffett's 'Window on the World,'" astronaut Steve Robinson observed. "I think that came from Kay's family." "Ah, lovely," Patrick replied.
2/17/2010	"Oh Yeah" by Johnny A., played for Mission Specialist Stephen Robinson.
2/18/2010	"I'm Gonna Be (500 Miles)" by Steven Curtis Chapman played for Pilot Terry Virts.
2/19/2010	"In Wonder" by Newsboys, played for Pilot Terry Virts.
2/20/2010	"The Distance" by Cake, played for all six astronauts from their flight control team in the Mission Control Center in Houston.
2/21/2010	"The Marines' Hymn" played for Commander George Zamka, who is a colonel in the Marine Corps.

## A Little Flight Music: NASA Contest for Wake-Up Songs Prompts Astronauts to Recall Tuneful Highlights

From daily wake-up songs to portable music players, music is a big part of life in orbit

By John Matson

**SPACE JAMS:** Eric Boe, pilot of the STS 126 mission, exercises with a portable music player on space shuttle *Endeavour* in 2008.

NASA

As deejay gigs go this is a short one, but the audience is captive and the venue is very exclusive. With a recently announced contest, NASA has opened the door to the public to choose music to be played for astronauts during the final two scheduled space shuttle missions. Four winning songs will serve as wake-up music on the missions, currently pegged for November and February launches.

Wake-up music is a tradition that, according to a NASA history of the practice, stretches back to the Apollo moon program. Ground control pipes a tune up to the spacecraft to rouse the crew from their sleep shifts, and often a crew member's family will choose a song with special meaning for their relative. In this case the two wake-up songs will be chosen from a selection of past shuttle tunes, and two more will be selected from original, space-themed compositions submitted by musicians.

The contest will probably provide a nice public relations boost for the space agency, but what about the astronauts? Does in-flight music even register during the rigors of space travel?

Apparently it does. Wake-up music provides both a source of camaraderie and a connection to

home, according to a few former astronauts, who shared their memories of the practice via e-mail.

"Wake-up music is one of my favorite parts of a mission," says Pamela Melroy, a veteran of three shuttle missions between 2000 and 2007. "The way I was taught by my commanders, and the way I ran wake-up music on my flight as a commander, was to know in advance what crew member and what song was being played each morning." That way, she says, there would be no question of whose family was waiting for acknowledgment on the ground.

"I set a small timer right by my head for about two minutes before, and I would gently wake up the crew member whose turn it was and make sure they were in place on the flight deck—upstairs—in time to hear the music," Melroy explains. "I would stay up there with them, make sure they knew the name of the song if they weren't sure, and basically be there with them to witness their moment. It's a very fond memory from being a commander—to share those few minutes with each crew member and their loving families."

One of the most popular wake-up selections through the years has been Louis Armstrong's "What a Wonderful World," which has appeared on no fewer than 11 shuttle missions, including one mission on which it was played twice for two different astronauts. (The song's late co-composer, George David Weiss, died August 23 at the age of 89.) Armstrong's recording was cued up at least three times for Scott Parazynski, who flew on five shuttle missions between 1994 and 2007. "What a Wonderful World' was always the perfect accompaniment to the vistas from space," Parazynski says. "My family played it for me on several missions, typically before big EVA days." (Short for extravehicular activity, EVA is NASA-speak for a spacewalk.)

"My son Luke also dedicated the theme to *Star Wars* to me before the solar array repair we did on STS 120," a 2007 shuttle mission to the International Space Station, Parazynski adds. That was probably Parazynski's biggest day ever on the job, he says, and "it really made me smile, and put me in the perfect state of mind to go face the challenge."

Wake-up music also offers an opportunity for lightheartedness, as was the case on STS 92, a 2000 mission to the space station. On the fifth day of the mission, ground control woke the crew with "Camelot," from *Monty Python and the Holy Grail*. That moment rates as three-time shuttle flier Leroy Chiao's favorite encounter with shuttle music. All during training the crew was quoting lines from the film, "and on the day of the first spacewalk it was played for us," Chiao says. "It set the tone for the day, and we had a perfect spacewalk." Like Satchmo, Monty Python has been well represented on shuttle flights—the theme to *Monty Python's Flying Circus* television show

was played twice, and the U.K. comedy troupe's "The Galaxy Song" was played once.

Melroy's favorite wake-up music memory comes from that same 2000 shuttle mission. "One of the movies we loved as a crew was *So I Married an Axe Murderer*," she recalls. In one scene the father of the main character (both father and son are played by Mike Myers), a caricature of a Scotsman who tends his own Scottish Wall of Fame, dances arm-in-arm with his wife to "Saturday Night," a 1970s hit by the Edinburgh pop group the Bay City Rollers. The mission's training team, knowing the astronauts' affinity for the movie, dedicated the song to the entire crew on the 11th day of the mission. "The whole crew crowded up on the flight deck, and Brian Duffy [the mission's commander] and I linked arms and mimicked the dance in the movie, floating around in zero g and cracking up," Melroy says.

Portable music players also find plenty of use in space. Parazynski relied on earbuds during workouts, and Chiao says some astronauts use them during work operations as well. "Most of us just use one earbud, and leave the other ear open to hear operational calls," he says. But sometimes personal players simply provide a musical accompaniment to one of the greatest vistas available to humankind. Melroy caught on to listening to music toward the end of her first shuttle flight. "Everyone else carried their CD players and headphones with them," she says, "and it wasn't until I did the same—perhaps eight days into the mission—and heard the swelling sounds of music as I looked out at the majesty of Earth that I realized what I had been missing."

## Discovery crew enjoys 'live' wakeup tune; packs for re-entry

03/08/2011 04:45 AM

By WILLIAM HARWOOD  
CBS News

In a first for mission control and a shuttle crew, the Discovery astronauts were awakened Tuesday with a live performance of "Blue Sky" by Big Head Todd and the Monsters, a tune inspired by the first post-Columbia mission. The song won the most votes in a NASA "Top 40" competition giving the public an opportunity to select the crew's wakeup music.

Playing an acoustic guitar, band leader Todd Park Mohr, singing solo but flanked by his three fellow musicians, serenaded the astronauts at 3:23 a.m. EST (GMT-5) to kick start Discovery's final full day in space.

"We've waited long for this day to come," he sang, "for all the midnight lights we've burned into the morning sun, I can't wait to see your sweet mysteries, the moon, the stars, the sun, the universe, the galaxies.

"Fly home on your silver wings, with your new song for the world to sing, light this candle, make it right."

Big Head Todd and the Monsters won a NASA competition allowing the public to pick two of the Discovery crew's wakeup songs, winning 722,662 of the more than 2.4 million votes cast. Second place went to the theme from the "Star Trek" television series, which was beamed up to the crew Monday with a

voice over by William Shatner marking Discovery's final mission.

"Hello everybody. Greetings, this is Todd from Big Head Todd and the Monsters," Mohr radioed Discovery from mission control.

"Well, good morning, Todd, thanks very much for that," commander Steven Lindsey replied from orbit. "That was great. Did you just do that live?"

"I did just do that iive, and I believe it's a first in history."

"Well, that was terrific, we really appreciate it and congratulations on winning the contest," Lindsey said.

"Well, on behalf of Big Head Todd and the Monsters and songwriters and artists everywhere, we just want to thank you so much for your courage and your bravery and your effort in just giving all of us a better shot at knowing more. It's very inspirational to the arts as well. I just want you to be home safely and as soon as you can."

"Thank you very much," Lindsey said. "We all wish you could see what we can see when we look out at the Earth and hopefully, everybody will be able to do that one of these days. Hopefully sooner rather than later."

"We'll work on that together. Thank you so much."

- 3/2/2011 "The Speed of Sound" by Coldplay. It was played for Pilot Eric Boe.
- 3/3/2011 "City of Blinding Lights" by U2. It was for all the crew members.
- 3/4/2011 "The Ritual/Ancient Battle/2nd Kroykah," from volume two of "Star Trek: The Original Television Soundtrack" – better known as the Star Trek fight song – was played for the crew. The song was chosen by the crew's training team.
- 3/5/2011 Bowling for Soup's "Ohio (Come Back to Texas)," which was played for the whole crew.
- 3/6 /2011 "Spaceship Superstar" by Prism. It was chosen for all Discovery crew members by the team of flight controllers who have been supporting them overnight throughout the mission.
- 3/7/2011 The "Theme from Star Trek," performed by Alexander Courage, served as the wake up music for Discovery's crew at 2:23 a.m. It received the second most public votes from a Top 40 list in a Space Shuttle Program-sponsored song contest (671,134 votes (27 percent of the total). The top two songs with the most votes from that list earned the right to be played as wake up music for Discovery's crew during its final mission. As a bonus, actor William Shatner recorded a special introduction to the song:
- "Space, the final frontier. These have been the voyages of the Space Shuttle Discovery. Her 30 year mission: To seek out new science. To build new outposts. To bring nations together on the final frontier. To boldly go, and do, what no spacecraft has done before."*
- It was a fitting beginning to the day that will see Discovery undock from the space station for the last time. Discovery was the first space shuttle to dock to the International Space Station, during the STS-96 mission in 1999, marking just one time it did what no spacecraft had done before.
- 3/8/2011 "Blue Sky" by Big Head Todd and the Monsters. The song was performed live by Todd Park Mohr, vocalist and lead guitarist of the band, accompanied by fellow band mates Brian Nevin, Rob Squires and Jeremy Lawton. The song received the most votes in NASA's Top 40 song contest receiving 722,662 votes (29 percent of the 2,463,774 total). It was originally written as a tribute to the space program and workforce, and is routinely played in concert by the four-member band. The live performance was the first time a shuttle crew has been awakened "live" from Mission Control, Houston. "That was terrific," Lindsey radioed down to Mohr. "We really appreciate it and congratulations on winning the contest."
- Mohr, with his three band members in the control center, thanked Lindsey for his courage, bravery "and your effort in just giving all of us a better shot at knowing more. It's very inspirational to the arts as well."
- 3/9/2011 "Coming Home" by Gwyneth Paltrow chosen by the International Space Station flight control teams that supported the crew.

**STS-134**

May 16-June 1, 2011

Read NASA's Press Release announcing the winners of the STS-134 "Original Song Contest":  
[http://www.nasa.gov/home/hqnews/2011/may/HQ\\_11-154\\_Wake\\_Up\\_Songs.html](http://www.nasa.gov/home/hqnews/2011/may/HQ_11-154_Wake_Up_Songs.html)

- 5/16/2011 "Beautiful Day" performed by U2. The song was played for Commander Mark Kelly. Wounded U.S. Rep. Gabrielle Giffords helped start the first full work day in space for her husband and the crew of the space shuttle Endeavour with the song. It's the same song Giffords sent as a wake-up call to Mark Kelly in 2006 when they were just dating. But this time the message-of-hope lyrics seemed to have a special meaning given her recovery from being shot in the head Jan. 8 in Arizona. This time the song was from Giffords and Kelly's two daughters. "It's good to be waking up in space again," Kelly radioed back to Earth. "I want to thank Gabby, Claudia and Claire for that great wake up song. It's always good to hear U2 and 'Beautiful Day' in space."
- 5/17/2011 "Drops of Jupiter", a song by the band Train played for Pilot Greg Johnson, a tune selected for Johnson by his family and radioed up to the shuttle by Mission Control. "I love that song and I love being in space," Johnson radioed Mission Control. Johnson thanked his teenage son Matt for choosing the song and apologized for missing his birthday, which is tomorrow. "And I want to say that's a perfect way to start an exciting rendezvous day!"
- 5/18/2011 "Luna," performed by Jose Serrano for his friend Greg Chamitoff
- 5/19/2011 "We All Do What We Can Do." The song was sent up for Mike Fincke by shuttle thermal protection system engineer Dan Keenan, and Kenny McLaughlin, a Kennedy Space Center launch pad engineer. The two shuttle workers created the song to honor those who have helped make the space program a success.
- 5/20/2011 "In View" performed by Tragically Hip. The song was played for Andrew Feustel.
- 5/21/2011 "Il Mio Pensiero" performed by Ligabue. The song was played for Roberto Vittori.
- 5/22/2011 "Times Like These" by the Foo Fighters for Mission Specialist Andrew Feustel.
- 5/23/2011 "Svegliarsi La Mattina (Woke Up This Morning)" by the Italian duo Zero Assoluto, uplinked especially for Mission Specialist Roberto Vittori of Italy.
- 5/24/2011 "Real World" by Matchbox 20 for shuttle Pilot Greg Johnson.
- 5/25/2011 "Countdown" by the Canadian band Rush, played for Mission Specialist Mike Fincke. Fincke described how his friends Greg Shurtz and NASA employee Ken Fisher chose the song because the band was inspired to write it and the album "Signals" after viewing the launch of STS-1. Fincke went on to say the song was played as a tribute to the space shuttle program, which has inspired people around the world.
- 5/26/2011 A modified version of the song "Fun, Fun, Fun" with shuttle-themed lyrics, played for all six STS-134 crew members.
- 5/27/2011 "Will You Carry Me?" performed by Michael FitzPatrick. FitzPatrick has been an Electrical, Environmental, Consumables, and Mechanical flight controller at NASA's Johnson Space Center for more than 20 years and supported 80 missions.
- 5/28/2011 "Galaxy Song" performed by Clint Black. The song was dedicated to the whole crew by the flight control team.
- 5/29/2011 "Slowness" by the Tucson, Arizona-based band Calexico, was played for Kelly. Mark Kelly picked Calexico's "Slowness" as a wake-up call to honor his wife, Congresswoman Gabrielle Giffords, and her hometown, Tucson.

Kelly tells mission control in Houston that Gabby “really wants to get back there and is really looking forward to that, so it’s an appropriate song. That’s coming soon.”

5/30/2011 The original composition “Dreams You Give” by Brain Plunkett, the second place winner in the Space Shuttle Program’s Original Song Contest, which drew more than 1,300 entries. More than a million votes were cast online by the general public to choose two songs from among 10 finalists to be played to the astronauts.

5/31/2011 “Sunrise Number 1,” performed by the band Stormy Mondays. This song was chosen in an online vote of the general public as the winner in the Space Shuttle Program’s Original Song Contest, which attracted 1350 entrants.

**STS-135** July 8-July 2011

7/9/2011 “Viva la Vida” performed by Coldplay, a song picked by STS-135 Pilot Doug Hurley. The song was accompanied by a special good morning message recorded by employees at NASA’s Marshall Spaceflight Center in Huntsville, Alabama, the NASA center that has managed the Space Shuttle’s solid rocket boosters, main engines and external tank throughout the program’s history.

7/10/2011 “Mr. Blue Sky” by Electric Light Orchestra played for Commander Chris Ferguson.

7/11/2011 “Tubthumping” by Chumbawamba played for Mission Specialist Sandy Magnus.

7/12/2011 “More” by Matthew West played for Mission Specialist Rex Walheim.

7/13/2011 Flight Day 6 was kick-started for the STS-135 astronauts with a special wake-up message from Elton John and one of the legendary performer’s greatest hits. "Rocket Man" debuted around the time of the Apollo 16 mission, which sent men to the moon for the fifth time. The 4-½ minute song, which describes a long-term space bound astronaut’s mixed feelings at leaving his family to do his job, has been played to awaken four shuttle crews aboard Discovery and Atlantis. "Rocket Man" also, one of NASA’s top 40 wakeup call songs listed for voter selection during a contest to commemorate the Space Shuttle Discovery and Endeavour’s last missions, earned nearly 5,000 votes from the public. The song inspired by space exploration woke up the final space shuttle crew of Atlantis one last time: "Good morning Atlantis, this is Elton John. We wish you much success on your mission. A huge thank you to all the men and women at NASA who worked on the shuttle for the last three decades."

7/14/2011 Michael Stipe front man for R.E.M. started the crew’s day with an A capella version of the group’s hit, "Man on the Moon". On recording this song for the Atlantis’ last crew Stipe said, “I recorded ‘Man on The Moon’ for NASA in Venice, Italy, where Galileo first presented to the Venetian government his eight-power telescope, and in 1610 wrote 'The Starry Messenger' (Sidereus Nuncius), an account of his early astronomical discoveries that altered forever our view of our place in the universe.”

“Good morning, Atlantis,” he said. “This is Michael Stipe from R.E.M. We wish you much success on your mission, and thank all the women and men at NASA who have worked on shuttle for three decades. From Earth, a very good morning to you.”

7/15/2011 Sir Paul McCartney greeted the Atlantis crew with the Beatles favorite "Good Day Sunshine". "Good morning guys, wake up! And good luck on this, your last mission. Well done," McCartney said in a message recorded pre-launch for the final space shuttle crew.

7/16/2011 "Run the World (Girls)" After being awakened by a special greeting from songstress Beyonce Knowles. Beyonce also known as Sasha Fierce was born in Houston, also home of the final shuttle astronauts: Chris Ferguson, Doug Hurley, Sandy Magnus and Rex Walheim. Beyonce brought it on orbit when “Girls” was played for the entire crew as a tribute to the final shuttle mission and also to women in space: “Good morning Atlantis, this is Beyonce. Sandy, Chris, Doug and Rex, you inspire all of us to dare to live our dreams, to know that we’re smart enough and strong enough to achieve them. This song is especially for my girl, Sandy, and and all the women who’ve taken us to space with them and the girls who are our future explorers.”

- 7/17/2011 "Celebration" by Kool and the Gang, played for Mission Specialist Sandy Magnus. The song was accompanied by a special good morning message recorded by employees at NASA's Stennis Space Center in southern Mississippi, the NASA center that is home to the test stands that verified each of the main engines that helped propel space shuttles into low Earth orbit, including the three used in the STS-135 launch. "Good morning Atlantis, from your friends at Stennis Space Center," Stennis employees said. "It's time to fire up your engines – laissez les bons temps rouler!"  
"Laissez les bons temps rouler," is a Cajun French phrase that translates "Let the good times roll."
- 7/18/2011 "Days Go By" by Keith Urban, which was played for Mission Specialist Rex Walheim. The song was accompanied by a special good morning message recorded by employees at NASA's Johnson Space Center in Houston, TX. The NASA center is home not only to the astronaut corps, but also Mission Control and the Space Shuttle Program. "Good morning, Atlantis, from all of us at the Johnson Space Center!" chorused an auditorium-full of Johnson employees in a message recorded before Atlantis' launch. "Have a great mission!"
- 7/19/2011 "Don't Panic" by Coldplay, which was played for Pilot Doug Hurley. This was the last wakeup song played for a shuttle crew while docked to the International Space Station. Coldplay's "Viva la Vida" was the wakeup music for the crew on Flight Day 2.
- 7/20/2011 "Fanfare for the Common Man" by Aaron Copland played for Commander Chris Ferguson. It was followed by a prerecorded message from Kennedy Space Center employees. "Three ... two ... one ... Good morning, Atlantis!" the group said. "Kennedy salutes you. See you back at wheels stop!" Kennedy is home to the space shuttle fleet, along with its launch pads and the people who prepared the shuttles for each trip into space.
- 7/21/2011 Kate Smith's rendition of Irving Berlin's "God Bless America" woke Commander Chris Ferguson, Pilot Doug Hurley and Mission Specialists Sandy Magnus and Rex Walheim. But unlike most wakeup songs, which are played in honor of a particular crew member, this one was dedicated to all the men and women who have worked for the Space Shuttle Program in the past three decades... "the men and women who put their heart and soul into the shuttle program for all these years," as Capcom Shannon Lucid told the crew.

Ferguson said it was an appropriate song for their last day in space.

## INTERNATIONAL SPACE STATION (ISS)

...only a shuttle crew receives wake up music while a space station crew uses an alarm clock.

From: <http://spaceflight.nasa.gov/living/spacesleep/index.html>

*"Crew members will be allowed to take a certain amount of personal gear up with them," said Lu. "So things like checkers or chess sets, CDs and tape players, and the like are allowed. You can listen to your favorite music if you like. DVD movies will also be available for viewing."*

Edward Lu

*The station's Russian-built crew quarters is outfitted with only two small "staterooms." About the size of broom closets, the so-called "kayudas" feature porthole windows that face Earth.*

*The temporary sleep station is a hollow lab rack outfitted with a ventilation system, radiation protection, lights and electrical outlets for laptop computers or CD and DVD players.*

*And we actually can listen to music. We have speakers in the – in the service module, and also in the node where we can listen to whatever tunes we would like to listen to, and we also have a little CD players, private ones, that we can listen to with headphones in our little cabins...*

Carl Walz

Interview of Dan Bursch, Yury Onufrienko, and Carl Walz, Astronauts

Leon Harris, Miles O'Brien January 3, 2002 *CNN: Live This Morning*

*February 2, 2002 – Elvis, also known as Carl Walz, treated the teachers to a new version of "Heartbreak Hotel" during a live videoconference between teachers attending ISSEC and the Expedition Four Crew during ISS Educator Conference at Space Center Houston. "Well since I left my baby; I found a new place to dwell. It's 400 kilometers in the air. It's called space station Alpha. But baby it's lonely. Oh, it's so lonely. But I'll be back in May. Ohhhhhhh, yeah."*

*It turns out that music plays a big role. You know, of course, we have, CDs that we play when we work out, when we ride the bikes and exercise, or just to have on while we're living in space and of course we also brought along some musical instruments. It so happens that I have a small keyboard up here...And, so I can play that as well here, and we also have a guitar as well, so I've been learning how to play the guitar. I play the keyboard back home but the guitar is a new thing that I've picked up here in my free time.*

Carl Walz from *E-Town* radio show broadcast May 9, 2002 – "ISS Interview"

*Astronaut Ellen Ochoa, a classical musician, brought her flute as one of her personal items on her first shuttle flight. She only got to play it once, though, and that was as part of an educational video for school kids. On short shuttle flights, she explains, astronauts are so busy that they really don't have much time to play an instrument. "For a shuttle flight, it's probably more of a sentimental thing, a memento for people who have had music as a serious hobby."*

*But on long duration stints onboard the station, "you do have a fair amount of free time," says Walz, "especially on Sundays." There's more opportunity to take out an instrument and play.*

*"It's a link to home," says Walz, who plays for his hometown church, sings in the astronaut band, is known for his Elvis imitations, and, during his time on station not only played the keyboard, but also found the time to teach himself some guitar. Walz thinks that link is important. "Some guys might disagree, and say, 'well, you know, you want to cut all those links.' But I prefer to have them." No matter how long an astronaut remains in space, he says, "we all know we're going back to Earth. We know we're going back to that life..."*

*"In long duration," says Ochoa, "you want to prepare yourself for being away a long time. One of the things you want to do is to carry on with activities that are important to you on the ground. A lot of those, you can't. But whenever you can--and playing a musical instrument is an example -- people sure like to do that."*

*"The strangest thing about playing music in space," says Carl Walz, "is that it's not strange. In most homes, there's a musical instrument or two. And I think it's fitting that in a home in space you have musical instruments as well. It's natural."*

*"Music makes it seem less like a space ship, and more like a home."*

*"Space Station Music" [http://science.nasa.gov/headlines/y2003/04sep\\_music.htm](http://science.nasa.gov/headlines/y2003/04sep_music.htm)*

*"We have a small piano up here. It's an electronic piano, and I like to play the piano in my spare time," Lu explained to the 124 space campers at Space Center Turkey in Izmir during a July 14 contact arranged as part of the Amateur Radio on the International Space Station program.*

*"Ed Lu is "The Piano Man" Aboard the ISS "*

*July 23, 2003*

*This Sunday, the Expedition 12 crew aboard the international space station received a special treat -- a live musical wakeup call from Paul McCartney during a first-ever concert linkup. The wakeup call, during which McCartney performed "Good Day Sunshine" and "English Tea," came from McCartney's "US" Tour performance at the Anaheim, Calif., Arrowhead Pond. It was broadcast live on NASA TV.*

*NASA News 11/13/05*

*ANAHEIM, Calif. -- It was "Good Day Sunshine" for the international space station crew Sunday morning. NASA astronaut Bill McArthur and Russian cosmonaut Valery Tokarev were treated to a live wake-up call of the Beatles classic in a first-ever concert linkup to the space station.*

*On Earth, former Beatle Sir Paul McCartney performed the hit and another song, "English Tea," on Saturday night before a cheering crowd as part of his 11-week "US" tour.*

*The performance was beamed from the West Coast to the space station crew 220 miles above Earth and broadcast on NASA television, which showed live feeds from space.*

*McArthur and Tokarev bobbed up and down and sipped from squeeze pouches through the show, getting a rousing cheer from the audience.*

*"I can't believe that we're actually transmitting to space!" McCartney said. "This is sensational. I love it." McArthur, who did a couple flips, noted McCartney's creative achievements and thanked him for playing the songs.*

*"That was simply magnificent," McArthur said. "We consider you an explorer just as we are."*

*It is a tradition to wake astronauts up with recorded songs, but this marked the first time astronauts listened to live music from space.*

*The rock icon came up with the idea after learning that NASA's Mission Control used "Good Day Sunshine" to wake up the Space Shuttle Discovery astronauts in August with word that conditions were favorable to return to Earth.*

*The wake-up call marked the space station crew's 44th day of a planned six month mission in space.*

## MARS PATHFINDER & SOJOURNER ROVER

### Sol

- 4 “The Final Frontier” Paul Reiser, Don Was (Theme from “Mad About You”)  
*The team sent their "wakeup call" to Mars as a joke (it's not like a spacecraft would need music) and the team enjoyed it enough that it became a tradition. The "Mad About You" production office was surprised by the choice and put out a press release noting the unusual use for their theme song. They even used a clip of the Mars team playing the music in the end credits of one of their shows. PC*
- 5 “Three Little Birds” Bob Marley
- 6 “In the Mood” Glenn Miller (with live accompaniment by Chief Engineer Rob Manning)
- 8 “Coisinha Do Pai” Brazilian Samba
- 12 “You’ve Got a Friend” Randy Newman
- 13 “Follow You, Follow Me” Genesis
- 14 “Also Sprach Zarathustra” Richard Strauss (Theme from “2001: A Space Odyssey”)
- 17 “Roll to Me” Del Amitri
- 18 “Let the Good Times Roll” Ray Charles
- 19 “So Far Away” Dire Straits
- 20 “Life in the Fast Lane” Eagles
- 21 “Ride of the Valkyries” Richard Wagner
- 22 “Wild, Wild Life” Talking Heads
- 23 “Theme from Rawhide” Blues Brothers
- 24 “Radar Love” Golden Earring
- 25 “Wise Up” Bim Skala Bim
- 26 “Dreams” Van Halen
- 27 “I’ll Be There For You” Rembrandts (Theme from “Friends”)
- 28 “Long Distance” Kinks
- 29 “Learning to Fly” Pink Floyd
- 30 “The Way You Look Tonight” Frank Sinatra  
“Fantastic, That’s You” Louis Armstrong
- 32 “Love Me Like a Rock” Paul Simon
- 33 “You’ve Made Me So Very Happy” Blood, Sweat and Tears
- 34 “Let Your Fingers Do the Walking” Sort Sol
- 35 “The World is Waiting for the Sunrise” Gene Lockhart (father of June Lockhart of “Lost in Space”)
- 36 “Obscured By Clouds” Pink Floyd
- 37 “Where the Streets Have No Name” U2
- 39 “Mars Rovin’” Tempus Fugit and the Time Travellers

## MARS SPIRIT AND OPPORTUNITY

*The function of the Wake-Up Music is as it would suggest, to 'wake-up' the mission team and get them focused on the days activities. As we will see the selection is often a little bit tongue-in-cheek. The music was originally played for the team around the time that the "sweep" was transmitted to the Rover shortly after it woke up. This sweeps the transmit frequency so the Rover's receiver can lock onto it. This occurs at around 8.45AM local time (at the landing site). However this meant the song was being played before many of the team members came-in, so the time was subsequently shifted to 10AM local time. By this time most of the crew are on station and ready to begin the Sol's activities. Sol is the term for a Martian 'Day'. One Martian Sol is 39.5 minutes longer than one Earth Day.*

*The song (sometimes songs) for each Sol are typically chosen by the Mission Managers, in the case of Spirit this is Dr. Mark Adler. The songs are chosen for a link they have with the planned activities for the day.*

**NASA Gets Into the Groove!** From **Above Top Secret News Network**, February 21, 2004

The eclectic playlist is Mars rover Spirit mission manager Mark Adler's way of waking exhausted engineers and scientists who are working and sleeping on Mars time and dealing with a sometimes temperamental rover millions of miles away... Below is the Spirit playlist, along with some explanations by Adler for why the songs were chosen. A sol is a Martian day, slightly longer than a day on Earth at 24 hours, 37 minutes.

From: **Mars Rocks! Eclectic Music Moves Rover Mission.** By Robert Roy Britt February 26, 2004, **Space.com and Jet Propulsion Laboratory Rover Daily Updates.**

### Spirit's playlist:

- Sol 2: Good Morning, Good Morning, by the Beatles.
- Sol 3: Oh What a Beautiful Mornin', by Rodgers and Hammerstein.
- Sol 4: Hail to the Chief, by the Mormon Tabernacle Choir. (Presidential phone call.)
- Sol 5: Satisfaction, by the Rolling Stones. ("I can't get no ...", Air bags not cooperating.)
- Sol 6: Get Up, Stand Up, by Bob Marley. (Lift mechanism actuated.)
- Sol 7: Da Da Da, by Casaca. (Brazilian song suggested by investigator from Brazil, RRGTM student that week from Brazil.)
- Sol 8: Soak Up the Sun, by Cheryl Crow. (Laid-back sol.)
- Sol 9: I Can See Clearly Now, by Jimmy Cliff. (Picture taking sol.)
- Sol 10: Unchained, by Van Halen; Hit the Road Jack, by Buster Poindexter; Turn, Turn, Turn, by the Byrds. (Cable-cutting, backup on landing deck. start turn on deck.)
- Sol 11: I Get Around, by the Beach Boys; Round and Round, by Ratt; You Spin Me 'Round, by Thalía. (Rest of turn on landing deck.)
- Sol 12: Born to be Wild, by Steppenwolf; Rawhide, by Riders in the Sky; Who Let The Dogs Out?, by the Baha Men. (Egress.)
- Sol 13: Reach Out, by the Four Tops. (First robotic arm activity.)
- Sol 14: You've Got The Magic Touch, by the Platters. (Touching robotic arm down on Mars.)
- Sol 15: If You Love Somebody Set Them Free, by Sting; Roam, by The B-52's; Good Times Roll, by The Cars. (Last engineering activities, first drive on the surface.)
- Sol 16: After Midnight, by Eric Clapton; Trash Day, by Weird Al Yankovic. (Crew starts Mars day after California midnight, part of the sol dedicated to deleting contents of flash.)
- Sol 17: We Will Rock You, by Queen. (First arm activities and observations on a rock.)
- Sol 18: Sledgehammer, by Peter Gabriel. (Intended first [Rock Abrasion Tool] RAT sol, though ran into problems later, to put it mildly.)
- Sol 19: S.O.S., by Abba. (Objective was to regain contact with Spirit after a loss of communications. We did.)
- Sol 20: Baby, Talk to Me, from the musical Bye Bye Birdie. (Objective was to get Spirit to send data. She did.)
- Sol 21: Satellite, by The Hooters. (A rousing lullaby for when we were trying, and succeeded, to get the rover to go to sleep.)

Sol 22: We Can Work it Out, by The Beatles. (Beginning debugging activities to get Spirit back to normal.)

Sol 23: Start Me Up, by the Rolling Stones. (Booting in crippled mode.)

Sol 24: Flash, by Queen. (Clearly a flash problem, continuing to debug.)

Sol 25: (You're The) Devil In Disguise, by Elvis Presley, and With a Little Help From My Friends, by The Beatles. (Continuing debug, got picture!)

Sol 26: I Want a New Drug, by Huey Lewis & The News. (Trying yet another recipe for getting task trace, still didn't work.)

Sol 27: Anticipation, by Carly Simon. (Seeing if the file deletes will do the trick or not. They did.)

Sol 28: On the Road Again, by Willie Nelson. ("Can't wait to get back on ...", back to normal use of the flash file system, itching to get going.)

Sol 29: Here Comes the Sun, by The Beatles. (More normal operations, Mars Express coordinated overflight.)

Sol 30: Lean On Me, performed by Club Nouveau. (Intended RAT brush sol, pressing RAT on rock, though activities did not complete.)

Sol 31: I Wanna Be Sedated, by the Ramones. (Very low activity sol to get the rover rested and ready for surgery on the following sol.)

Sol 32: Wipe Out, by The Surfaris, and We're Not Gonna Take It, by Twisted Sister. (File system reformat.)

Sol 33: Back In the Saddle Again, by Gene Autry, and The Star Spangled Banner, performed by Beyoncé. (Back to normal operations, color flag picture on RAT.)

Sol 34: The Laundry Cycle: Pounded on a Rock, by The Bobs, and Bump N' Grind, by R. Kelly. (First RAT grinding.)

Sol 35: Up Around the Bend, by Creedence Clearwater Revival. (Intended drive around lander to begin drive to crater. Didn't get anywhere though.)

Sol 36: Stuck On You, by Elvis Presley. (Drive didn't work yestersol -- we've been stuck here for weeks. Drive did work later that sol.)

Sol 37: Proud Mary, performed by Tina Turner. ("And we're rolling, rolling, rolling on the river ...", first long drive, ended up being more than 20 meters.)

Sol 38: Runnin' With the Devil, by Van Halen. (HGA [High Gain Antenna] problem that sol, no activities, song played late in the sol.)

Sol 39: Hit the Road Jack, by Buster Poindexter. (Another long drive -- yes, this is a reuse of that song.)

Sol 40: What a Wonderful World, by Louis Armstrong. (Mars, that is.)

Sol 41: Open Road Song, by Eve 6. (Driving song, though only did several inches of driving to position in front of rock.)

Sol 42: Lift Up Every Stone, by John Hiatt. (Observations of the rock "Mimi".)

Sol 43: Livin' On a Prayer, by Bon Jovi. (Many sols tend to start with our fingers crossed.)

Sol 44: Way Over Yonder, by Carole King. (Heading for that crater.)

Sol 45: Touch Me in the Morning, by Diana Ross. (Touch and go sol.)

Sol 46: Wake Up Little Susie, by The Everly Brothers. (Generic wakeup song.)

Sol 47: Dig Down Deep, by Hot Soup. (Trenching sol.)

Sol 48: Working in the Coal Mine, by Devo. (Working in the trench.)

Sol 49: Coisinha Do Pai, by Beth Carvalho. (Brazilian song played on Mars Pathfinder, played again for Carnival weekend.)

Sol 50: Samba De Marte, by Beth Carvalho. (Brazilian song written by same artist inspired by use of previous song on MPF, this one is a "Mars Samba", also for Carnival weekend. Starts off "Hello NASA!".)

Sol 51: "Theme from 'Chariots of Fire'" by Vangelis. (Appropriate for slow-motion races.)

Sol 52: Cold as Ice by Foreigner.

Sol 53: Dust in the Wind by Kansas, with the anticipation of possibly capturing dust devils spinning across the Martian surface.

Sol 54: Big Rock in the Road by Pete Wernick as it made its final approach to the imposing rock called "Humphrey."

Sol 55: Brush Your Teeth by Cathy Fink and Marcy Marxer, and Knock Three Times by Tony Orlando and Dawn.

Sol 56: Walking On Sunshine performed by Jump 5.

Sol 58: I Still Haven't Found What I'm Looking For" by U2 to pay homage to its twin rover's amazing findings of water evidence at Meridiani Planum.

Sol 59: One More Time by The Real McCoy.

Sol 60: Pictures to Prove It by the Mighty Mighty Bosstones.

Sol 61: Motor Away by Guided by Voices.

Sol 62: My First Trip to Mars," by Atticus Fault.

Sol 66: Livin' on the Edge by Aerosmith since Spirit is at the edge of Bonneville crater.

Sol 67: On Top of the World by the Carpenters. The song was fitting, as yestersols's drive put Spirit at the rim of "Bonneville" crater, but it took some additional maneuvering to get the rover perfectly placed for the 360-degree panoramic camera images it will take on upcoming sols.

Sol 69: Watching the Wheels by John Lennon.

Sol 77: "One Step Closer" by the Doobie Brothers, since the rover was to make its final approach to the rock target named "Mazatzal" today.

Sol 80: "Open the Door" by Otis Redding.

Sol 81: "Boy from New York City" by The Manhattan Transfer, in honor of the grind on the New York target.

Sol 98: "Where Is My Mind?" by The Pixies in honor of its software transplant.

Sol 109: "(Take me) Riding in my Car" by Woody Guthrie.

### **Opportunity's playlist:**

- Sol 2: So Happy Together, by the Turtles (First full sol with both rovers on Mars.)

Sol 35: I Can See Clearly Now by Jimmy Cliff.  
Sol 36: Rock Steady by Sting.  
Sol 37: Let's Go by the Cars.  
Sol 38: Have You Ever Seen the Rain? by Creedence Clearwater Revival in honor of the confirmation that liquid water once flowed through the rocks at Meridiani Planum.  
Sol 39: "Bad Moon Rising" by Creedence Clearwater Revival in honor of the eclipse caused by the Martian moon Deimos.  
Sol 41: On the Road Again by Willie Nelson.  
Sol 43: "You Can Look (But You Better Not Touch)" by Bruce Springsteen in recognition of the fact that the rock abrasion tool grind did not touch the surface of its rock target on sol 42.  
Sol 44: "Try (Just a Little Bit Harder)" by Janis Joplin for the rock abrasion tool's second attempt at "Mojo 2," and "X-ray Eyes" by Kiss for the alpha particle X-ray spectrometer.

Sol 45: "Eclipse" by Pink Floyd in recognition of the transit of the martian moon, Phobos. A second song, "Meet Me Halfway" by Kenny Loggins, was played because Opportunity is halfway through its primary 90-sol surface mission.

Sol 46: The wakeup songs were "Berry Nice News" by Raffi and "Huckling the Berries" by Country Cooking in honor of researching the mysterious "blueberries" with the instruments on the robotic arm.

Sol 47: "No Particular Place to Go" by Chuck Berry in recognition of the stay at "Berry Bowl."

Sol 48: Jaws: Main Title and Fist Victim by John Williams.

Sol 50: The Dentist by Bill Cosby, in honor of the toothy targets in "Shark's Cage."

Sol 51: Song of the South by Alabama.

Sol 53: Ice Cream Man by John Brim woke Opportunity this sol to remind it of the possible sweet treats that await at targets referred to as "Chocolate Chip" and "Coconut" in the neighborhood dubbed "Mudpie."

Sol 54: "I Feel The Earth Move" by Carole King.

Sol 56: Fly Like an Eagle by the Steve Miller Band.

Sol 57: "If You Don't Get it the First Time, Back Up and Try it Again" by the JB's and Fred Wesley.

Sol 58: "Come on Home" by Lambert, Hendricks and Ross beckoned Opportunity back toward its landing site crater to an area of bright material.

Sol 59: "59th Street Bridge Song (Feeling Groovy)" by Simon and Garfunkel.

Sol 60: "The Circle of Life" by Elton John in honor of the Lion King panorama.

Sol 64: "Stand" by REM.

Sol 65: "Back in the Saddle" by Aerosmith.

Sol 66: "Bounce" by Bon Jovi. Opportunity's rock abrasion tool ground into "Bounce" for just over two hours.

Sol 67: "Changes" by David Bowie.

Sol 68: "Got to Go Back" by Van Morrison.

Sol 69: "Little Maggie" by Tom Adams, chosen for the soil target named "Maggie."

Sol 70: "Truckin'" by The Grateful Dead.

Sol 72: "The Wanderer" by Dion and the Belmonts.

Sol 73: "Let the Good Times Roll" by B.B. King - a nod to Spirit's successful primary mission of 91 sols and a call for more good times during the coming sols.

Sol 79: "Teenage Lobotomy" by Ramones. Opportunity began operating with new flight software.

Sol 82: "I Would Walk 500 Miles," by Less Than Jake (originally by the Proclaimers).

Sol 85: "Take Me Out to the Ball Game!" by Jack Norworth in honor of all the baseball-related target names chosen this sol.

Sol 101-102: "Morning has Broken" by Cat Stevens; "Hallelujah Chorus" from George Frederic Handel's Messiah; and "Dazed and Confused" by Led Zeppelin.
